Cascade
MPS150
150 mm Manual Probe System

Overview

The MPS150 is an easy to use, yet highly precise manual probe platform for wafers and substrates up to 150 mm. It supports a wide variety of applications and accessories. The modular and flexible design allows to configure and individualize the system to match application requirements. With the System Integration for Measurement Accuracy (SIMAT) kit, MPS150 can be operated independent of third party instrumentation, ensuring the shortest signal path.

Combining the MPS150 probe system with our measurement expertise, FormFactor provides pre-configured application focused probing solutions for wafer qualifications, and an integrated measurement solution for accurate S-parameter measurements, which include everything you need to achieve accurate measurement results in the shortest time, with maximum confidence.

Features / Benefits

Flexibility	• Ideal for a wide range of applications such as RF, mm-Wave and sub-THz characterization, PA, DVAC, MEMS, Photonics and Reliability Testing • Re-configuration and upgradable as requirements grow • Minimizes setup times with no loss of performance or accuracy • Seamless integration of various measurement instruments
Stability	• Compact and rigid mechanical design • Built in vibration isolation solution for superior vibration attenuation • Thermally stable chuck and microscope • Integrates easily into anechoic chambers
Ease of use	• Ergonomic and straightforward design for comfortable and easy operation • Quick and ergonomic changer of DUT through pull out stage • Foot brake to stop

MPS150

Mechanical Performance

Note: For physical dimensions and facility requirements, refer to the MPS150 Facility Planning Guide.

Chuck Stage

Travel	155 mm x 155 mm (6 in. x 6 in.)
Resolution	5 µm
Chuck travel per 360 mm (6 revs)	50 mm
Fast stroke, Y axis	50 mm
Z height adjustment range	10 mm
Z contact / separation / overdrive	0.5 mm adjustable
Tilt range (total deviation)	360'
Theta travel (total)	± 8°
Theta resolution	73 x 10⁻⁶ gradient

Manual Microscope Stage (On Bridge)

Travel range	50 mm x 50 mm (2 in. x 2 in.) 150 mm x 150 mm (6 in. x 6 in.)
Resolution	1.5 µm (0.2 µm)
Scope XY	Motorized 150 lead or linear precision

Programmable Microscope Stage*

Travel range	50 mm x 50 mm (2 in. x 2 in.)
Resolution	0.25 µm (0.01 mm)
Scope XY	Motorized 150 lead or linear precision

* Electronics box for motorized stages (PN 107-023 required

Platen System

Platen

Platen space (typical)	Universal platen space for up to four DPS/Cs (DPS1xx/DPS4xx/RPS210) or up to twelve CRP210 (optionals) Universal platen with optional probe card adapter: space for up to eight DPS1xx/DPS4xx/DPS4xx/RPS210 or up to twelve CRP210 (optionals)
Z height adjustment range	Manual platen: space for up to four DPS1xx/DPS4xx/RPS210 (all positioners) Maximum 40 mm (depending on configuration)
Minimum platen to chuck height	16 mm (universal platen)
Separation (X)	200 µm
Separation repeatability	< 1 µm
Vertical rigidity / force	5 µm / 10 N (2.3 lbf) x 2.5 N
Accessory mounting options	Universal platen (magnetic), vacuum RF platen (with strain, magnetic

MPS150

Wafer Chuck

Standard Wafer Chuck

Diameter	150 mm
Flatness	10 µm (typ)
DUT sizes supported	Blank or pieces (25 mm 2 in.) through 150 mm (6 in.)
Vacuum ring diameter	Universal: 4 mm, 7 mm, 22 mm, 42 mm, 66 mm, 88 mm, 110 mm, 132 mm
	Standard: 22 mm, 42 mm, 66 mm, 88 mm, 110 mm, 132 mm
Vacuum ring actuation	Universal: all connected in manifold, center hole 1.5 mm diameter Standard: mechanically actuated, center hole 1.5 mm diameter
Chuck surface	Planar with centric engraved vacuum grooves
Surface planarity	< 7 µm
Rigidity	1.5 N per 10 N of edge

RF Wafer Chuck

Diameter	150 mm with two additional dicht chucks
Flatness	Stainless steel with DRT(DPS) surface (RA and 0.4 mm holes)
DUT sizes supported	Main: single (5/7) down to 2 mm x 5 mm size or series (15 mm/2 mm/5 mm) through 150 mm (6 inch)
Vacuum hole sections (diameter)	22 mm, 42 mm, 66 mm, 88 mm, 110 mm, 132 mm (four holes in center with 2.5 mm x 2.5 mm distance)
Resonance of dic	Mechanically selected
Chuck surface	Planar with 0.7 mm diameter holes in centric sections
Surface planarity	< 7 µm
Rigidity	< 15 µm / 15 N of edge

Triax Wafer Chuck

Diameter	150 mm with three additional dichtl chucks (two with vacuum feature)
Flatness	Stainless steel
DUT sizes supported	Main: series 50 mm through 150 mm Aux1: up to 50 mm x 25 mm or 0.7 inch/1 inch
Vacuum hole sections (diameter)	50 mm, 100 mm, 150 mm (2 inch, 4 inch, 6 inch)
Resonance of dic	Mechanically selected
Chuck surface	Planar with 0.4 mm diameter holes in centric sections
Surface planarity	< 25 µm

MPS150

Non-Thermal Chucks

Note: Results measured with non-thermal chuck of standard probing height (6/250 µm) with chuck in a dry environment. Motion in the chuck may degrade performance.

MPS CHUCKS-CS12

Operator voltage	Standard (in accordance with IEC 60950, certificates for higher voltages available upon request
Isolation*	> 2 GΩ
Capacitance*	900 pF

* Factory test with multimeter with maximum 2 GΩ range

MPS150

Non-Thermal Chucks (continued)

MPS CHUCKS-RF

Operator voltage	Standard (in accordance with IEC 60950, certificates for higher voltages available upon request
Isolation (Signal-Shield)	200 pF
Capacitance (Signal-Shield)	90 pF

MPS CHUCKS TRIAX

	In Purgeld Shield Enclosure	Open*
Isolation*	> 200 G	50G
Leakage (I-signal)	< 50 fA	< 200 fA
Leakage (average)	1pA	1pA
Leakage (P-A)	< 100 fA	< 1000 fA
Resistance of (S)	< 1 TΩ	< 1 TΩ
Resistance dic (S)	> 1 TΩ	> 1 TΩ
Capacitance of (S)	< 1 pF	< 1 pF
Residual capacitance at 3 µA 1V	< 1 pF	< 1.5 pF
Capacitance at 200 pA (P-S)	< 400 pF	< 700 pF
Capacitance at 200 pA (S-A)	< 400 pF	< 200 pF

TRIAXIAL PROBE ARMRF

	Standard Triaxial Arm (PN 10-012-0) in Purgeld Shield Enclosure	Advanced Triax Option (PN 107-083 and 20-CP) in Purgeld Shield Enclosure
Isolation*	> 50G	> 50G
Leakage (I-S)	< 1 fA	< 2 fA
Resistance of (S)	> 1 TΩ	> 1 TΩ
Resistance dic (S)	> 1 TΩ	5G
Residual capacitance at 3 µA 1V	< 1 pF	< 0.3 pF
Capacitance at 200 pA (P-S)	< 400 pF	< 190 pF
Capacitance at 200 pA (S-A)	< 400 pF	< 200 pF

COAXIAL PROBE ARMRF

	Coaxial Probe Arm (PN 10-010-0) Open - Ambient**
Resistance (Signal-Shield)	> 20 TΩ
Capacitance (Signal-Shield)	< 200 pF

1 Not conditions: (RSG) with GMC-RRST test box and calibration ground unit (CA-223). Because test setup, IF is HF-Mode PC2, Factor 10.
2 Measuring with Agilent 4156C and Triax Cable Kit Triax-F-Triax-F coaxial-triax adapt. 10 HF-Mode PC2, Factor 40.
3 Depending on DC-DC voltage accumulation.
4 Environment data (not specification data).
5 Depending on humidity.

MPS150

Thermal Chuck Performance

Note: For details on facility requirements, refer to the Facility Planning Guide for your thermal system.

MPS TC100-C-TTX-3000[1]

		Time # 30°C	Time # 200°C	Cooling 200°C to 100°C
Breakdown voltage[2]	Force to guard	> 500 V	> 500 V	> 500 V
	Guard to shield	> 500 V	> 500 V	> 500 V
Resistance[3]	Force to guard	> 500 V	> 500 V	> 500 V
	Guard to shield	> 1 TΩ	> 1 TΩ	> 1 TΩ
	Force to shield	> 1 TΩ	> 1 TΩ	> 1 TΩ
Chuck leakage[4]		< 5 x 10⁻¹⁴	< 2 x 10⁻¹	< 5 x 10⁻¹
Settling time[5] to 10 fA		500 ms (typical)		

MPS TC100-C-TTX-3000 (using cross-line adapter)[1]

		Time # 30°C	Time # 200°C	Cooling 200°C to 100°C
Breakdown voltage[2]	Signal to shield	> 500 V	> 500 V	> 500 V
Resistance[3]	Signal to shield	> 1 x 10¹	> 1 x 10¹	> 5 x 10¹
Chuck leakage[4]		< 600 fA	< 75 pA	< 1 nA
Residual capacitance		< 600 pF		

MPS TC100-DC-3000[1]

		Time # 30°C	Time # 200°C	Cooling 200°C to 100°C
Breakdown voltage[2]		> 500 V	> 500 V	> 500 V
Resistance[3]	Signal to shield	> 1 x 10¹	> 1 x 10¹	> 5 x 10¹
Chuck leakage[4]		< 600 fA	< 75 pA	< 1 nA
Residual capacitance		< 600 pF		

MPS TC100-DC-3000[1]

		Time # 30°C	Time # 200°C
Breakdown voltage[2]	Force to guard	> 500 V	> 500 V
	Guard to shield	> 500 V	> 500 V
Resistance[3]	Force to guard	> 5 x 10¹	> 5 x 10¹
	Guard to shield	> 2 x 10¹	> 8 x 10¹
	Force to shield	> 2 x 10¹	> 8 x 10¹
Chuck leakage[4]		< 600 fA	< 80 fA
Residual capacitance		< 600 pF	
Settling time[5] to 10 fA		500 ms (typical)	

MPS150

Thermal Chuck Performance (continued)

MPS TC100-C-DC-3000 (using cross-line adapter)[1]

		Time # 30°C	Time # 200°C
Breakdown voltage[2]		> 500 V	> 500 V
Resistance[3]	Signal to shield	> 5 x 10¹	> 5 x 10¹
Chuck leakage[4]		< 600 fA	< 75 pA
Residual capacitance		< 600 pF	

1 Performance values determined using EMV (shielded) Chamber. Actual value depend on electromagnetic surrounding and shielding situation of the probe station.
2a. For fabricated chuck: 90°C for 60 minutes + 200°C for 240 minutes + 200°C for 480 minutes.
2b. For fabricated chuck: 90°C for 60 minutes + 200°C for 480 minutes.
3a. For fabricated chuck: 90°C for 60 minutes + 200°C for 240 minutes + 200°C for 480 minutes, controller set (Z-AC)" environment with ≤ 30% humidity.
3b. For fabricated chuck: 90°C for 60 minutes + 200°C for 480 minutes (Z-AC)" environment with ≤ 30% humidity.
4. Measurement of chuck leakage current with Keithley 4200 SCS Semiconductor Characterization System. Chuck connected due to instrument voltage limitation driving through current limiter resistor. Noise floor of measurement chuck of offset only due to disturbances in the probe station environment.
5. Settling time measured with 8552D and SMU8751. (5/7/8/9/10 SMU program or equivalent. This value specifies standard deviation (Sy).
6. Chuck Standard Deviation 8552D and 8751.
6. Depend on test environment.
7. Settling time is measured with 8552D with SMU8751 - 5/7/8/9/10 SMU program or equivalent

MPS TC100-C-TTX-3000 and MPS TC100-RF-3000 Specifications

Temperature range	30°C to 300°C
Temperature accuracy	± 0.1°C (with calibrated controller)
Temperature resolution	0.1°C
Temperature uniformity	± 0.1°C @ 30°C, ± 0.1°C @ 300°C
Chuck flatness	± 30 µm (0.12 mil) @ 30°C to 300°C
Available cover	• 150 dB(fc) (normal operation) • 75 dB(fc) (max. cooling mode)

MPS TC100-DC-3000

Temperature range	+30°C to 200°C
Temperature accuracy	± 0.5°C
Temperature resolution	0.1°C
Temperature uniformity	± (+1°C (30°C - 200°C)
Chuck flatness	± 30 µm (0.12 mil) @ +30°C to 200°C
Available noise	• 75 dB(fc) (normal operation) • 58 dB(fc) (max. cooling mode)

MPS150

Ordering Information

Pre-Configured Application Focused Packages

CPW150PACK

MPS150-C

CPW150PACK-S

Integrated Measurement Solution

RF-gamma

Part Number	Description
EPS150C1xx2	150 mm manual probing solution for DC parameters test
EPS150C1xx2PLUS	150 mm manual probing solution for DC parameters test (including plate)
EPS150TR1xx2	150 mm manual probing solution for low noise measurements
EPS150RF	150 mm manual probing solution for RF applications
EPS150RF-S	150 mm manual probing solution for RF, mm-wave and sub-THz applications
EPS150TR	150 mm manual probing solution for triax analysis
RF-gamma xx2	RF-gamma calculation kit, turn key solution for measurements up to 6.5 GHz 5/8/10/12/15 GHz
RF-VBB	FormFactor certified Vubiqiu for RF-gamma xx2 upgrade[1]

1 Enter the frequency range for a VNA of your choice. Example: RF-gamma-xx2 for 6.5 GHz. RF-gamma-20 for 20.5 GHz.
2 Minimum requirements are: Windows 7 or Windows 7 or 8GB (32 bits) or 2 GB (64 bits) or newer, 4 GB memory or more (64 GB recommended)/ 320 GB disk space or more. SCPI + TCIP interface. USB 2.0 port

MPS150

Regulatory Compliance

Certifications: CE, cRoHS,ul, CB

Warranty

Warranty[1] Fifteen months from date of delivery or twelve months from date of installation

Service contracts Single and multi year programs available to suit your needs
