

CLARIFICATION

The models **TS1520D** and **TQ1520D** refer to the same product. Within the manufacturer's internal system, **TS1520D** serves as the internal reference code used for production and system tracking, while **TQ1520D** is the official product model name used in all external documentation and labeling. In the offer form, the internal code **TS1520D** was entered as the system product reference, while **TQ1520D** appears as the official model designation. Both codes correspond to the same item with identical specifications, features, and appearance.

The technical description and product photos clearly show the model number **TQ1520D** on the mats. The dual marking is solely a result of the manufacturer's internal coding system and does not indicate any difference in the product itself, therefore no change to the offer is required.
