

## Connection tubing

**Aspiration pump tubing** is a tubing that works as an extension from the aspiration needle to the aspiration pump. Equipped with male/female luer connections - male luerlock towards the aspiration needle and female luerlock towards the protection filter on the aspiration pump.

Ref	Product	Package
10402	Aspiration pump tubing 150 cm	200 units
10401	Aspiration pump tubing 200 cm	200 units
10400	Aspiration pump tubing 300 cm	100 units

## Protection filter

Apsauginis filtras

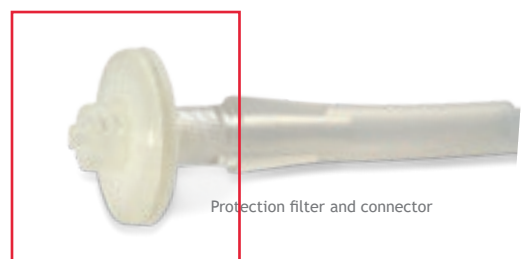

The **pump protection filter** is a hydrophobic protection filter designed to prevent any fluid from getting into the aspiration pump. It is single packed and sterile and the purpose is only to protect the aspiration pump.

The pump protection filter fits the supplied luerlock connector intended to be mounted permanently on the air-intake valve of the aspiration pump.

The connector fits the following aspiration pumps:

- Craft aspiration pump
- Rocket Digital aspiration pump
- Cook Vacuum Pump
- Pioneer Pro-Pump

The pump protection filter eliminates the glass bottle used on the classic Craft suction pumps. Should always be exchanged in case full suction has been used.

Ref	Product	Package
10441	Pump protection filter w/ 3 connectors	25 units
10440	Pump protection filter	100 units

## Aspiration pumps

The **Rocket Suction Pump** is a digital aspiration pump that provides smooth, low volume vacuum at pre-determined negative pressures, allowing simple, low turbulence oocyte recovery. It is designed with immediate vacuum response and cut-off, intuitive rotary control and blue LED vacuum display.
