Enhance®

Finishing and Polishing System

Product Description

The Enhance Finishers (Discs, Cups and Points) are pre-mounted, single use, aluminum oxide impregnated, cured urethane dimethacrylate resin finishers designed for preparing composite surfaces for their final polish.

When used as directed, this system will yield a smooth, contoured surface with pre-polished surface luster on composites and compomers.

For optimal surface polish, follow the use of Enhance Finishers with appropriate polisher, e.g. PoGo Polishing System or Prisma Gloss Composite Polishing Pastes.

Enhance Tip

System Kit

20 x Enhance Finishing Discs

624075
