# VITRA C2.25

## STAGE V ENGINE

Environmentally friendly engine with 25 HP

## SILENT CABIN SUSPENSION

Newly developed hydraulic cab suspension

## HIGH LOAD CAPACITY

Load capacity of 1320 kg - The largest of the class

## SIMPLE OPERATION

Ensure short training and efficient work

## MULTI-FUNCTIONALITY

One machine for all the year's tasks

## COMPACT & FLEXIBLE

The Vitra C2.25 is the smallest model in the series and with a strong chassis of only 105 cm in width, articulation and 4wd, it is both working day in a tight urban environment. With a strong and environmentally friendly STAGE V engine, it also contributes to a good performance.

Danfoss powertrain, combined with a comfortable cabin ensures the highest performance as well as a unique work environment, where suspension system ensures optimum stability and effectively eliminates noise and vibration, which together provides a comfortable environment.

### Features & Benefits

The new Vitra C-Series has full focus on easy accessibility for both the daily check and for general service access.

The two side covers are mounted on strong hinges and can be easily swung out to the side to provide good access to the engine compartment. The top cover is easily removed - also with an attachment mounted and the daily check and service work can not only be done unhindered, it is done easily without demounting the attachment.

The Vitra C-Series is built with the new "Silent Cabin" cabin suspension which consists of up to 8 hydraulic dampers.

The newly developed suspension system ensures comfort, without compromising driving characteristics and stability. The system effectively minimizes vibrations and noise and ensures the driver optimal working conditions even on a long working day. The suspension has no maintenance and no expensive wheel suspension which gets worn.

The cabin in the on an optimal w

With ergonomics steering column operation, ISO-a ventilation syste a comfortable ar achieved

## Technical Specifications

|                                |                     |
|--------------------------------|---------------------|
| Engine:                        | Yanmar              |
| Performance:                   | 25 HK / 18 KW       |
| Pollution norm:                | STAGE V             |
| Fuel:                          | Diesel (28 L)       |
| Driving speed:                 | 0-27 km/h.          |
| Noise level in cabin:          | < 75 db(A)          |
| Front Lift: (Lifting capacity) | Kat 0 (450 Kg.)     |
| PTO:                           | Max 50 l. / 200 bar |
| Small PTO:                     | Max 15 l. / 160 bar |
| Length:                        | 2790 mm.            |
| Width:                         | 1070 mm.            |
| Height:                        | 1980 mm.            |
| Wheelbase:                     | 1300 mm.            |
| Ground clearance:              | 150 mm.             |
| Turning radius:                | 731 mm.             |
| Wheel size:                    | 240/60-12           |
| Weight / Running weight:       | 1160 / 1220 Kg.     |
| Total weight:                  | 2500 Kg.            |
| Load capacity:                 | 1320 Kg.            |
| Trailer: (Braked / Not Braked) | 1250/750 Kg.        |

## WINTER

Snow clearing with brush, dozer blade or V-Drop- or disc spreader with high load capacity. Truckbed with the possibility of direct reading.

See attachments for Winter Service..

## GREEN CARE

Mowing with the option of rear discharge or ability grass collector, hedge cutter, etc. Leaf collection with high load capacity.

See attachments for Green Care..

## OUTDOOR CLEAN

PM2.5/10 approved sweeping suction with Effective weed control with hot air, hot water. Front shovel, hydraulic truckbed, pallet forks.

See attachments for Outdoor Cleaning..
