

1 OdoCare is the first odourless waste container for the disposal of incontinencematerials.

Odourless

The patented OdoCare storage system is sealed airtight. The unique storage design keeps unpleasant odours contained in a special odourless bag. The OdoCare bags can be stored separately without leaking odour.

Hygienic

The OdoCare comes with a recyclable disposable. This disposable can be easily changed if necessary, or with each cleaning shift. By using the OdoCare there is no visual contact anymore with the disposed materials. Because of this hygienic storage solution, the risk of viruses will be reduced.

Easy to use

The Odocare has a large opening so any size of incontinence material will fit. The OdoCare is an one hand control system, just drop and flip the handle. Due to the ergonomic design, the OdoCare bag can be changed easily.

Transportable

To meet the existing demand of mobility, the OdoCare can be equipped with wheels (Tente). The OdoCare can be attached to any laundry car with the special OdoCare adapters.

Environment

6 In recognition of the environmental responsibility, the disposable of the OdoCare is made of recycled materials, such as used diapers and other plastics. Next to this, materials, which are stored in the OdoCare can easily be separated from normal trash and presented for recycling purposes that meet EU guidelines. Easy to clean and disinfect. 5

Large Capacity

The OdoCare is available in two versions. The OdoCare 75L and 45L. The Odocare 75L is designed for larger institutions such as nursing homes, hospitals, private clinics, etc. For home use and smaller institutions, we recommend OdoCare 45L.

Improves the habitat

Because of the reduction of unpleasant odours everybody benefits. Conditions for residence, nursing staff and visitors will be improved. Furthermore a substantial declining of labor costs can be achieved in the daily routines.

ACCESSORIES

4 Comes with diaper collection bags, but also user-friendly garbage bags.

7 The inner bags of the lid are spec. product that can be replaced by dirt or rupture.

OdoCare 45

Content: 45 liters

Weight: 8 kg

Mobile

Dimensions: (LxWxH) 600x470x750

Capacity: 6-9 used incontinence products (Sr. Diaper pants, disposable washcloths, nitrile gloves, catheter and wound materials and stomas)

Sauskelnų konteineris-vežimėlis 75 L Odocare

- Konteineris skirtas išmesti panaudotas suaugusių asmenų sauskelnes.
- Pagrindinė paskirtis yra nepraleisti blogo kvapo kol sauskelnės yra šio konteinerio maiše. Tuo būdu yra smarkiai sumažinamas blogas kvapas įstaigoje.
- Sauskelnės gali būti konteineryje savaitę ir daugiau, blogas kvapas nepasklis per šį laikotarpį.
- Specialus rutulio formos dangtis, leidžia įdėti sauskelnes ir tuo pačiu nepraleisti jau esamų sauskelnių kvapo.
- Konteineris pagamintas iš tvirto plastiko.
- 75 litrų talpos. Apytiksliai telpa 15-18 suaugusiųjų sauskelnių.
- Išmatavimai: 600 (ilgis) x 460 (plotis) x 970 (aukštis) mm.
- Su 100 mm dydžio ratukais.
- Specialių priedų (užsakomi atskirai) pagalba, konteinerį galima tvirtinti prie logistikos vežimėlių vamzdžių ir taip traukti juos abu kartu.

PRIEDAI:

Vidiniai Odocare konteinerio dangčio maišeliai (užsakomi atskirai)

- Maišelis skirtas įstatyti į Odocare sauskelnių konteinerio rutulio formos dangtį.
- Pagamintas iš specialaus plastiko žiedo su maišeliu.
- Lengvai keičiamas.

Šiukšlių maišai Odocare 75L 250vnt.

- Galima naudoti bet kurio gamintojo šiukšlių maišus, svarbu kad būtų pakankamo ilgio.
