

## IPS® PressVEST Premium

IPS® PressVEST Premium is a universal, phosphate-bonded investment material for the following Ivoclar Vivadent press ceramics:

- IPS e.max® Press
- IPS e.max ZirPress
- IPS InLine® PoM (Press-on-Metal ceramic)
- IPS Empress Esthetic

IPS PressVest Premium can be used in the popular speed heating procedure as well as with conventional heating methods. The high stability during the preheating phase allows materials with different expansion values to be processed. IPS PressVest Premium is therefore ideally suitable for milled and printed objects made from wax or acrylic. Due to the material's optimum properties, IPS PressVest Premium has only a slight reaction layer, which is very easy to remove, and allows for a silky smooth, homogeneous surface.

IPS PressVEST Premium **cannot** be used for metal casting, due to the high temperatures.

## Ivostar® | Gnathostar® Shade Guide

The Ivostar® / Gnathostar® shade guide allows the practitioner to determine the tooth shade according to the A-D or Bleach shade system. The shade tabs are made of the original Ivostar® tooth material and are correspondingly layered.

### Ivostar®

The attractive and versatile Ivostar® anterior teeth are composed of three layers. They are made of high-quality PMMA, and they are available in esthetic Chromascop, A-D and Bleach shades.

#### Delivery forms

<b>Ivostar®   Gnathostar® Shade Guide</b>	<b>1x</b>	<b>626888</b>

## Disposable Products

### ICON Interdental brushes standard

High tensile strength, plastic coated, stainless steel wire at the core prevents the brushes from bending. Brush is also fully flexible and after bending will return to its original shape. The brush and handle are manufactured as a complete unit so there is no need to assemble. Additionally each brush has its own hygienic cap which can also be used as a handle extension (except ID114 and ID115).

Pack of 6 pieces

Size	XXXX	XXX	XX	X	F	M	L	XL
