

HS SUTURE TAPE®

ULTRA HIGH MOLECULAR WEIGHT (UHMWPE)
POLYETHYLENE NON-ABSORBABLE SUTURE TAPE

107.3.1. p.d.

Pagaminta iš ultra aukštos molekulinės masės polietileno, nesirezorbuojanti siuvimo juosta.

VIBRANT HIGH STRENGTH ORTHOPEDIC SUTURE TAPE

HS SutureTape® is an HS Fiber® polyethylene suture offered in a tape configuration. The flat surface of the tape helps brace and distribute more consistent loads while still giving the strength needed. The broad, flat, braided portion also provides for greater surface area fixation compared to traditional suture, while the colored warp strand enhances visibility.

Our HS Suture Tape® products are great for:

ROTATOR CUFF REPAIR & ANCHOR TYPE DEVICES

BRAND COMPARISON

Knot-Pull & Straight-Pull Tensile Strength

TEST ARTICLE	SIZE (width)	TEST METHOD	FAILURE MODE	
HS SUTURE TAPE®	2 mm	Knot-Pull	88.7 lbf	394.7 N
		Straight-Pull	183.7 lbf	817.3 N
"Market Leader"	2 mm	Knot-Pull	65.1 lbf	289.5 N
		Straight-Pull	152.8 lbf	693.0 N
