

The Sliding Suture Cutter is designed to cut suture blindly when visualization of the knot is not possible, or when the surgeon prefers to cut suture without reverting to the arthroscopic image. The Sliding knot Suture Cutter has a single eyelet large enough to accommodate sutures.

## 1.3 p.d. slankus siūlų kirpiklis

**ORTHO-Safe-Lock:**  
A locking mechanism to prevent premature cutting of the suture.

**Sliding, Fadenschneider**  
Sliding, Suture Hook

Beschreibung Description	Arbeitslänge Working Length	Griff mit Positionierung ORTHO-Safe-Lock handle
Schaft gerade - ohne Abbildung shaft straight - not illustrated	Fadenschneider 155mm Sliding Suture Cutter 155mm	54-057.11

## 1.2 p.d. siūlų manipulatorius

**Fadenmanipulator**  
Suture Manipulator Grasper

Beschreibung Description	Arbeitslänge Working Length	Standard Griff Classic Handle	Axialgriff ohne Sperre Axial Handle w/o ratchet
Schaft gerade* shaft straight	155 mm	54-058.01	54-058.02

The Knot Pusher/Manipulator are designed to facilitate tying both sliding and non-sliding knots arthroscopically. The tip is a complete rounded ring that reduces the friction on the suture while sliding the knots. The eyelet of the knot pusher is suited to accommodate varying suture sizes.

## 1.1 p.d. Mazgo nustūmėjas ir manipulatorius

**Knotenschieber, geschlossen**  
Knot Pusher/Manipulator, full loop

Beschreibung Description	Arbeitslänge Working Length	
Schaft gerade shaft straight	125 mm	54-060.13
Schaft gerade shaft straight	155 mm	54-060.16
Schaft gerade shaft straight	220 mm	54-060.22
