ZY-30x120-B

LED Panel Lamp

LED panel for recessed installation in suspended ceilings

CHARACTERISTICS

Modern, energy saving and durable LED luminaires in a form of flat panel designed for installation in suspended ceilings with modules of 600 x 600mm or gypsum-board by special mounting clips (not included in the set with luminaire).

Luminaires are equipped with LEDs SMD type, which allow high energy saving comparing to traditional luminaires, keeping the same lighting parameters. High colour rendering index CRI, close to natural light, provides vivid rendering of the environment.

Light colour: neutral white - 4000K.

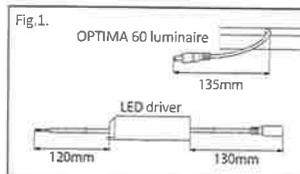

LEDs lifespan: 50 000 hours.

LED external driver included in the set.

Driver's supply voltage:

220-240V AC, 50/60Hz.

Wires dimensions according to [Fig.1].

CONSTRUCTION

LED panel's body is made from aluminum profiles with power coated, back cover is made of steel, and milky cover is made of polystyrene(PS)

APPLICATION

Specially recommended for illumination of computer rooms, meeting rooms, lecture halls, offices, institutions and other public facilities, as well as a decorative lighting, in hotels, guest houses, that raises aesthetic value of the area.

TECHNICAL DATA

Model No:	ZY-30x120-B
Power of the luminaire	36W
Supply voltage	220 - 240V AC
Frequency	50/60Hz
Beam angle	120°
Power factor (cos φ)	0,9
Protection class	IP 20
Protection class	II
LEDs type	SMD
Light colour	neutral white
Correlated colour temperature	4000K
Colour rendering index (CRI)	80
LEDs lifespan*	50 000 hours
Luminous flux of the luminaire**	3240 lm
Ambient temperature	-10°C ~ +45°C
Weight	1,30kg

* parameter is provided with ±5% tolerance margin

This symbol stands for selective collecting of the electrical and electronic equipment, therefore, this product cannot be treated as other household's waste. It has to be left at a special used-equipment collection point. The appropriate dealing with the collection of used electrical and electronic equipment is crucial, especially if the equipment includes dangerous components which have a negative influence on the environment and on the health of people.

► Installation in suspended ceilings with modules of 600 x 600mm

1. Connect LED panel with LED driver by cable with plug [Fig.2].
2. Connect the LED driver to the mains ~230V, 50/60Hz [Fig.3].
3. Place the luminaire in the suspended ceiling frame.

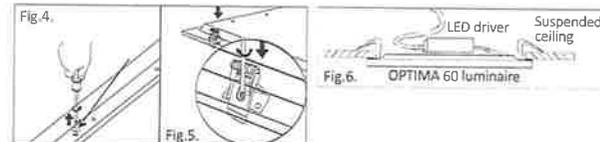

► Installation in suspended gypsum board ceilings by special UM-3 mounting clips (not included in the set with luminaire)

1. Fix the mounting clips to the luminaire [Fig.4.] and [Fig.5.].

2. Cut out proper mounting hole in the ceiling.
3. Connect LED panel with LED driver by cable with plug [Fig.2.].
4. Connect the LED driver to the mains ~230V, 50/60Hz [Fig.3.].
5. Place the luminaire in the suspended ceiling [Fig.6.].

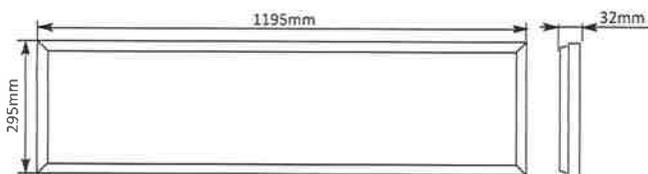

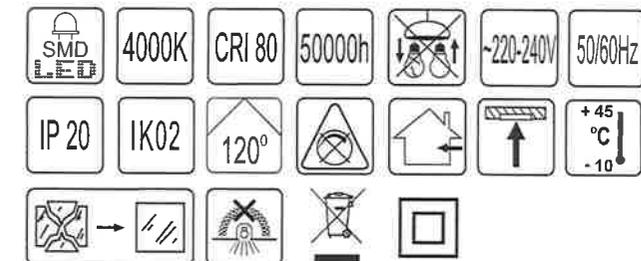

CAUTION!

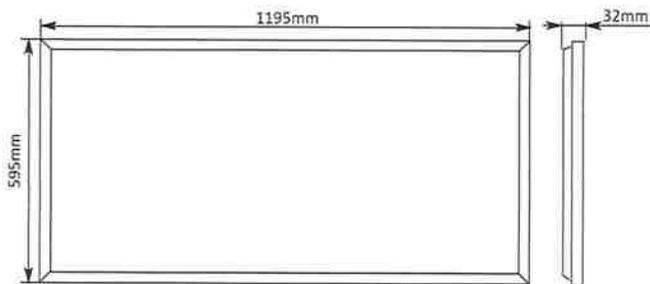

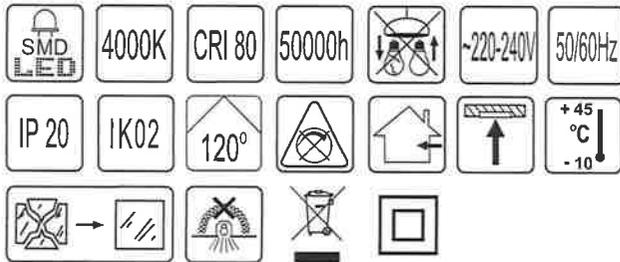

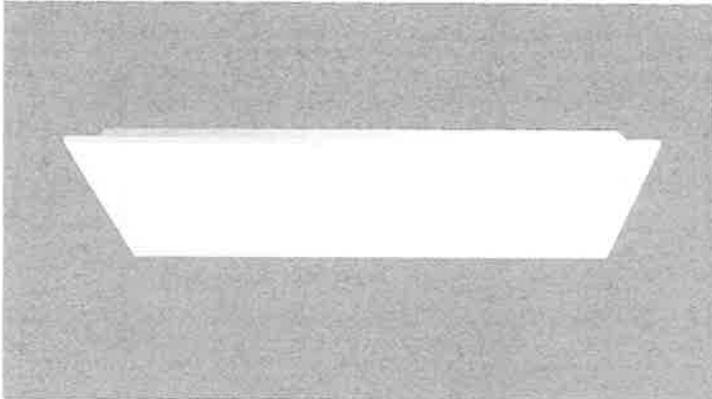

1. Terminal block for current ~230V is not included. An advice from qualified person is needed for installation.
2. Light sources are not replaceable; once light sources are used up, full luminaire should be replaced.

SAFETY AND MAINTENANCE

1. Installation of the luminaire should be done by the certified and experienced electrician. Before starting the installation you must absolutely turn off the main power supply, where the luminaire should be connected to, to avoid accidental voltage connection!
2. Electrical cables must be connected according to the instruction and regulations in force.
3. To keep the optimal technical parameters of the luminaire the periodical maintenance should be carried out. Before cleaning the product, disconnect it from power supply. Ignoring this warning can cause danger of electric shock. The housing of the luminaire should be cleaned by generally available cleaning supplies and also dried with a soft cloth. Do not use corrosives chemicals and solvents. Do not use stream of water under pressure.
