

## Skinsept® pur/color

What skin disinfection  
is all about!

- Colorless/colored
- Free of iodine
- Highly effective

Health Care

# Skinsept® pur/color

## What skin disinfection is all about!

### Application/area of use

During each surgical operation when skin is cut, disinfection of the skin is essential because the protective barrier is broken and micro organisms such as bacteria and fungi can easily enter the body.

### Recommended use in accordance with German law

Apply undiluted solution with soaked sterile swab or spray, rub in with sterile swab and let it soak. Please pay attention to the following contact times:

Skin antiseptic before injections and punctures.	Contact time at least 15 seconds.
Skin antiseptic before punctures of joints, body cavities, hollow organs and surgical intervention.	Contact time at least 1 minute. Then repeat disinfection process
Skin antiseptic on skin rich in sebaceous glands.	Contact time at least 10 minutes.

### Ingredients

100 g of Skinsept® pur/Skinsept® color contains: active pharmaceutical ingredients: Ethanol 46 g (96% denatured with ethyl methyl ketone), Isopropyl alcohol 27 g, Benzyl alcohol 1 g. Other ingredients: Hydrogen peroxide solution 30%, purified water.

For Skinsept® color in addition: Colouring agents Ponceau 4R (E 124) and Sunset Yellow (E 110).

### Evaluation reports

Skinsept® pur and Skinsept® color have been broadly tested and approved.

Please ask for our compilation of expertises.

### Package sizes

500 ml Skinsept® pur	SC4H
500 ml Skinsept® color	SP4H

### Our offer

Special preparation for preoperative disinfection of skin. Suitable for injections, punctures, blood sampling, vaccinations and before changing bandages.

Broad spectrum of efficacy against germs on skin such as bacteria, incl. TB, hepatitis B viruses, HIV, rota- and herpes viruses.

Fast killing of germs, short contact time.

Basis of active substances: combination of different alcohols, e.g.:

- good persistent efficacy
- no traces left on skin
- defatting of skin
- fast drying
- free of iodine

According to German drug law:  
Approved proprietary medicinal product.

Skinsept® color: colored with approved water-soluble pharmaceutical coloring.

Declaration according to German law: **Ingredients:** 100 g of Skinsept® pur/Skinsept® color contains: active pharmaceutical ingredients: Ethanol 46 g (96% denatured with ethyl methyl ketone), Isopropyl alcohol 27 g, Benzyl alcohol 1 g. Other ingredients: Hydrogen peroxide solution 30%, purified water. For Skinsept® color in addition: Colouring agents Ponceau 4R (E 124) and Sunset Yellow (E 110). **Areas of application:** Ready-to-use solution for skin disinfection. Recommended use before surgeries, injections, punctures, blood sampling, vaccinations and changing bandages. **Side effects:** none known. **Contra Indications:** Not appropriate for the disinfection of mucous membranes and large-area wounds. Do not use in direct proximity of the eyes. Do not use for newborns. **Precautions for use/warnings:** Mildly flammable (German Decree on Flammable liquids: B). Do not spray near flames. Combustion point: 21 °C (69,8 ° F) (according to German Industry Norm 51755). Follow application directions and safety guides. Allow product to dry before using electric devices. Caution required in use with alcohol sensitive surfaces. Skinsept® color contains the colouring agents E110/E124. Those agents can cause allergic reactions to persons who react extremely sensitive. The allergy often occurs to persons who are allergic against acetylsalicylic acid. Keep out of reach of children; Store in original container and not above 25 °C (77,0 °F). Do not use after expiration date and take care of an appropriate disposal.

### Your benefit

Safe disinfection of skin for all indications and areas of use.

Safe disinfection of skin for all indications and areas of use.

Time saving and practical use.

- high safety even during long operations
- highly suitable for maintenance of central venous catheter
- good skin tolerance, undisturbed wound healing and high satisfaction among patients
- time saving „two in one“ technique: disinfection and defatting of skin in one process
- Quick preparation of incision area, quick use of incision tapes, rapid possibility of incision
- suitable for patients with iodine allergy.

Best possible legal protection for user.

Excellent marking of operational field. Easy to get out of clothes and easy to remove from floors.

We offer complete service and systems to cover all of your institutional, industrial, and hospital cleaning and sanitation needs. Ask for more of our products and services in Europe and worldwide.
