Recommendation

AS LAFIPA is partner of AS RTGAS SILTUMS (Riga District Heating Company) since 1996.

In cooperation with AS LAFIPA (in chronological order) the following advanced heating technique projects have been developed.

- 1) programme of installation of individual heat substations (substitution of four pipe heat supply systems with two pipe systems (liquidation of central heat points));
- 2) retrofit of heat sources in local networks (installation of automated natural gas boiler houses);
- 3) reconstruction of 50 MW electricity / 50MW heat capacity cogeneration station (the third largest in Latvia) with original application of absorption heat pump in turbine oil cooling loop with 5 MW returned heat capacity to district heating network (awarded "The Best Engineering Project in Latvia 2010");
- 4) investigation of solar energy usage in district heating.

For twelve year period AS LAFIPA provides heat energy metering services on the base of AS KAMSTRUP heat energy meters.

AS RTGAS SILTUMS recommends AS LAFIPA as reliably, sustainable and professional cooperation partner in modern and actual business niches, including the renewable energy technology. Best regards
