

## Nitrile Examination Gloves

Latex free disposable examination gloves, made of extremely soft nitrile rubber, powder free. Textured finger tips ensures optimum grip and tactility.

Highly elastic and especially tear resistant, high tensile strength. Excellent fit and sensitivity features. Good chemical resistance/protection.

Nitrile gloves can be used for all procedures within health care, where there is a need for a good protection against blood contamination, viruses, chemicals etc.

Especially suitable for persons prone to latex allergy (typ 1) or Phthalates (plasticizers)

### Ultra Comfort, Nitrile Examination Gloves, Powder Free, White, 240 mm

State of the art technique Nitrile examination glove. High tensile strength with good protection against chemo drugs and chemicals, still very durable.
