**Electrode lifetime**

The lifetime of Radiometer Electrodes is per default the same as the warranty period, which for most of our electrodes is 18 months from date of production. Additionally for the pO<sub>2</sub> electrode warranty is 25 months. Date of production is indicated by a 2-letter code on the electrode.

The warranty period is according to our experiences significantly shorter than the lifetime of the electrodes, but Radiometer will not guarantee a longer lifetime.

Best regards  
RADIOMETER MEDICAL ApS
