

## Special Cell Cleaning Solution

### Order information

REF	CONTENT	Analyzer(s) on which <b>cobas c</b> pack(s) can be used
07224656 190	Special Cell Cleaning Solution (79 mL*)	System-ID 08 6973 8 <b>cobas c</b> 513

\*The value encoded in the instrument settings is 72 mL to account for the dead volume of the bottles.

### English

#### System information

**SCCS (D2):** ACN 948

#### Intended use

Wash solution for reaction cells on the **cobas c** 513 system.

#### Summary

Cell washes are required due to possible cuvette carry-over of HbA1c reagent.

#### Reagents - working solutions

NaOH 3 mol/L (approximately 12 %); sodium hypochlorite solution (< 2 % active chlorine); additive

The reagent is in position B and C.

#### Precautions and warnings

For in vitro diagnostic use.

Exercise the normal precautions required for handling all laboratory reagents.

Disposal of all waste material should be in accordance with local guidelines. Safety data sheet available for professional user on request.

For USA: For prescription use only.

This kit contains components classified as follows in accordance with the Regulation (EC) No. 1272/2008:

Danger

H290 May be corrosive to metals.

H314 Causes severe skin burns and eye damage.

#### Prevention:

P280 Wear protective gloves/ protective clothing/ eye protection/ face protection.

#### Response:

P303 + P361 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower.

P304 + P340 IF INHALED: Remove person to fresh air and keep comfortable for breathing. Immediately call a POISON CENTER or doctor/physician.

P305 + P351 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

Product safety labeling primarily follows EU GHS guidance.

Contact phone: all countries: +49-621-7590, USA: 1-800-428-2336

#### Reagent handling

Ready for use

#### Storage and stability

Shelf life at 2-8 °C: See expiration date on **cobas c** pack label.

On-board in use and refrigerated on the analyzer: 7 days

#### Materials provided

See "Reagents – working solutions" section for reagents.

#### Assay

The reaction cell carry-over evasion is pre-programmed on the **cobas c** 513 analyzer. It is not necessary for the user to manually define and configure the wash cycles.

A special wash with the Special Cell Cleaning Solution (SCCS) is performed automatically after the fifth usage of each cuvette. For this purpose the **cobas c** pack SCCS must be present on the analyzer. If it is not present on the analyzer the instrument issues a "stop alarm" when attempting to start.

#### Symbols

Roche Diagnostics uses the following symbols and signs in addition to those listed in the ISO 15223-1 standard.

CONTENT	Contents of kit
→	Volume after reconstitution or mixing
GTIN	Global Trade Item Number
