## Product Information

**Pop up power dock** designed to have always accessible all the electrical outlets and USB connectors in the furniture thanks to its design with cover and manual hiding. All outlet power strips are completely hidden when not in use.

This vertical extension lead tower has **one type F Schuko socket (EU)** with a maximum power up to 3500W - 16A and **a USB connector** for quick recharging of electronic devices 5V DC (1 x 2,4A) with a maximum power of 12W. The outlet and the USB connector are hidden behind a flat stainless steel cover that slides for better access.

Its installation is very versatile since it requires only a **Ø60mm machining** (it fits perfectly on the desks already equipped with a 60mm grommet) and can be installed on surfaces with thickness between 1 and 65 mm. Additionally, it can be attached to the furniture without tools thanks to a manual fixing nut.

It also has a 1,5m cable with plug to **operate at 230V AC 50Hz** with IP20 protection.
