

**Compatibility of**  
**Olympus flexible endoscopes with**  
**Sekusept Aktiv manufactured by ECOLAB**

Dear customer,

Olympus has thoroughly tested the material compatibility of Olympus flexible endoscopes with the Disinfectant Sekusept Aktiv manufactured by ECOLAB Company Limited. The results showed that Sekusept Aktiv is functionally compatible with most Olympus flexible endoscopes and TV camera products. A slightly increased wear and tear can happen in individual cases, which will not significantly decrease the durability of Olympus endoscopes.

**NOTE**

It is known from our field experience that the application of several processes for the reprocessing of endoscopes might accelerate damages to materials of the instruments. The above information is only valid for the exclusive influence of the mentioned process using the products named above.
