

Affiniti Ultrasound System

Affiniti 70

The Affiniti 70 ultrasound system offers a powerful combination of performance and workflow for quick, confident diagnosis.

Affiniti 70 features a re-architected system design that provides significant reduction in power consumption*. The compact imaging and processing core allows for a reduced footprint and body size.

Our EcoPassport

As a company committed to doing business sustainably, we are keen to help our customers make responsible choices. We offer solutions that improve people's health and well-being while reducing impact on the environment.

Our EcoPassports summarize the environmental benefits our products offer in one or more of our focal areas. For example, increased energy efficiency, more sustainable packaging, or a circular-ready product design, optimized for repair, refurbishing and recycling.

In this way, we want to help ensure that each purchase decision is the right one for our customer's needs *and* the planet.
