

Clean printing Clear results

SlideMate slides and SlideMate Plus adhesion slides from Epredia

Experience crisp, clean printing with SlideMate™ microscope slides from Epredia, designed for the SlideMate AS slide printer*. SlideMate slides can help reduce identification issues common to handwritten labels when paired with the SlideMate AS slide printer.

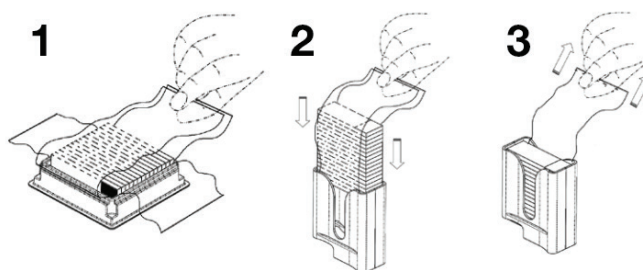

SlideMate Microscope Slides

- Smooth, 3/4 in. white tab validated to work with the SlideMate AS slide printer
- Tab is impervious to virtually all common laboratory chemicals and reagents
- Available in adhesion and non-adhesion formulas. SlideMate Plus adhesion slides feature an adhesive coating for routine clinical applications
- Our microscope slides are made from extra-white glass, manufactured to high quality standards in our Swiss manufacturing site. The clarity achieved by our manufacturing process helps ensure high levels of transparency to aid in accurate diagnosis
- Slides come pre-cleaned, thin, flat, and with finely ground edges – each pack is wrapped to help protect against humidity and moisture
- All SlideMate slides are manufactured in the USA of Swiss glass

*SlideMate slides have been validated for use with the SlideMate AS. Customer validation required for use with other thermal transfer printing systems.

**Note: The heat setting for SlideMate AS Printers when used in conjunction with SlideMate Slides may need to be lowered compared to the heat setting when using SlideMate AS Printer with Superfrost Slides. Each SlideMateAS Printer should be optimized individually.

Slides are packed with a special inner wrap to assist with loading into the SlideMate AS hopper to prevent contamination due to handling.

SlideMate Microscope Slide

- White tab, 25 x 75 x 1 mm, ground edges, 90° corners
- 72 slides/pack, 20 packs/case

SlideMate AS Thermal Transfer Slide Printer

The SlideMate AS printer is designed to enhance lean workflow with a fully integrated touch-screen and simple software. Built-in barcode scanners read cassette information and import the data to the slide label, printing it directly onto the SlideMate slide.
