declare under our sole responsibility that following products are in conformity with Regulation (EU) 2017/745 of the European Parliament and of the Council of 5 April 2017 on medical devices and its corrigenda on May 2019 and on December 2019.

### Classification:

**Class I (sterile)** according to Annex VIII of the Regulation (EU) 2017/745 of the European Parliament and of the Council of 5 April 2017 on medical devices

### Intended Purpose:

**Surgical drapes, general-purpose, sterile** are single-use sterile drape, or a collection of various drapes packed together into a ready-made set, designed to isolate a site of surgical incision or surgical / procedure field from microbial and particulate contamination in an operating or procedure room.

Intended Users are Health Care Professionals.

There is no restriction to a specific patient population.

The product is sterile.

The product intended for single use.

Duration of product use is short term contact (no more than 30 days).

The products principle of operation is to function as a mechanical barrier covering the parts of the patient's body, preventing transfer of airborne organisms into the surgical wound.

The evercare<sup>®</sup> drapes are assessed to be High Performance drapes according the standard EN 13795-1. The Critical area of a High-Performance drape is the whole drape area, surrounding the surgical incision site. While Less Critical area of a High-Performance drape area is on side drapes used for covering non-surgical site.
