Carrier 120 MK2? The Pro Mount MK2 comes with one stage of our two stage adapter system so you can add on any Stabilizing Mask or Light Source Adapter Plate to use whichever film carrier model you own on the Pro Mount MK2.

## Precision

Our Pro Mount MK2 is a precisely designed device featuring leveling feet to guarantee a level plane for scanning. The bottoms of the leveling feet also feature small anti-slip feet for added stability and precision. Users of our 4x5 Light Source Pro will need to add the [Pro Mount MK2 Leg Extension Kit](#).

## Dust removal

Our most exciting feature on the Pro Mount MK2 saves you a tremendous amount of time and frustration in post production. The Pro Mount MK2 includes an anti-static brush that securely attaches to the Mount, coming in line with the film gate of our film carriers. Most dust and unwanted debris will be automatically removed from your film BEFORE scanning, saving you time and energy.
