

MSV-3500, Multi Speed Vortex

Basic Plus
Product Class

DESCRIPTION

Multi Speed Vortex **MSV-3500** is designed for soft or intensive mixing of reagents in different size and type plastic tubes (0.2 to 50 ml).

It is designed for operation in life science laboratories working in the fields of biochemistry, cell and molecular biology.

Unit has four types of interchangeable platforms: for Eppendorf type microtest tubes, 10/15/50 ml tubes (diameter 12/16/30 mm). Platforms can be ordered separately or as one set with **MSV-3500**.

Speed and time are under microprocessor control. LCD display indicates two lines of values: the set and actual values of speed and time. **6. Galimybė tiksliai skaitiškai nustatyti apsisukimo greitį**

Unit provides high maximum speed of platform rotation efficiently mixing microvolumes (less than 5 µl) of samples.
