## 11065 AIREX FITLINE 140

Mats for medical gymnastics, yoga, aerobics, multi functional for outdoor use.

The Airex mat ensure an excellent shock-absorbing effect. Each cell acts as a small air cushion. A safe and comfortable posture is the key to success in a program of therapeutic activities. Airex mats feature a special closed-cell foam and ensure bacteria and fungi developing prevention. They do not soak up water, nor absorb humidity or dust.

The choice of AIREX professional products is based on the assessment of the characteristics that ensure they are:

- Warm and comfortable to touch
- Easy-to-clean: they can even be soaked in water
- Compact, non-slip, thin
- Durable and resilient: they can bear any kind of stress
- Shock-absorbing - in spite of their reduced thickness to provide great stability in balance exercises
- Extremely lightweight and flexible, easy to roll up and store away
- Impermeable: closed-cell structure
- CE mark compliant (93/42/EC)

**CAUTION:** due to the particular manufacturing process, the mattress measures may differ slightly from those stated here, especially in the length direction.

## 05000 GONIOMETER

The algo-goniometer contained in the "Spine Leg Toolkit" case brings together in one instrument two important functions that have been intentionally associated for their frequent concomitance: **joint examination and pain assessment**.

The joint examination represents a fundamental step in the evaluation of the musculoskeletal system at any age and acquires particular importance after a trauma, orthopedic interventions, inflammatory pathologies or degenerative joints, allowing to document both the spontaneous trend over time and the effectiveness of the therapeutic measures. The tool is then indispensable where there is need to correctly position an adjustable orthosis.

**Dimensions:** 20.5 x 4.5 x 2 h cm; **Weight:** 1.4 kg

- 13.
1. Skirtas pirštų sąnarių judesių amplitudei matuoti.
2. Ilgis 20,5 cm
3. Skalė nuo 0° iki 360°, kas 2°.

### A CLASSIC, ALWAYS ESSENTIAL TOOL

Pain assessment is recognized today as an obligation for each user who is taken in charge and its documentation represents an essential standard for every healthcare facility. The instrument presented here has a double scale: the method of smileys (Wong Baker) for the child from 3 years and the VAS scale (visual-analogue scale) from 8 years onwards. In the first one, the choice is made from a series of smiley faces with different expressions, in the second a cursor indicates the score along a graduated scale from 1 to 10. The pain scale usually depends on the user and, subsequently, at shorter or longer intervals depending on the problem, acute or chronic.
