

Dragos WorldView Threat Intelligence

Analyst-driven ICS/OT cybersecurity threat research

Industrial asset owners and defenders are focused on keeping processes running in their ICS/OT environments - yet they're often faced with too many alerts, without the resources or actionable guidance to remediate them all. The techniques cyber adversaries use, the vulnerabilities they exploit, and what that activity looks like in industrial environments are ever-changing developments that are hard to pin down, and the number of adversaries continues to grow.

Dragos leads the industrial cybersecurity market by delivering ICS/OT threat intelligence research with consolidated knowledge and skills gained from hunting adversaries, deconstructing malware, analyzing vulnerabilities, and engineering threat detections, all with a focus on industrial operations.

KEY BENEFITS

- Decrease the time it takes to detect adversary threats.
- Improve the signal to noise ratio in your SOC.
- Address ICS/OT vulnerabilities with less effort.
- Avoid downtime and reduce time to recovery.
- Know the impact of ICS/OT cyber events through executive insights.

What You Get With a WorldView Subscription

- Comprehensive reporting on the latest ICS/OT cyber risks with implications for your industry sector and region
- Detailed knowledge of ICS/OT adversary intrusions and tactics, techniques, and procedures (TTPs) mapped to MITRE ATT&CK for ICS
- IOCs in context of OT operations: suspicious domains, IP addresses, malware samples, file hashes, registry keys, etc.
- Refactored CVSS scores that reflect the OT impact and exploitability of ICS vulnerabilities
- Enriched mitigations and alternatives to circumvent the need to patch across many ICS/OT advisories
- Technical analysis of malware developed to initiate and execute ICS/OT cyber attacks
- Defensive recommendations from ICS/OT experts
- Threat detections, IOCs, and vulnerability enrichments regularly codified in the Dragos Platform

Dragos WorldView Threat Intelligence provides National Grid with clearly articulated intelligence, backed by evidence and specific information to help us mitigate threats. The clear understanding Dragos has of the environment in which we operate, allows us to cut through the hype around many potential industry vulnerabilities.

How Your WorldView Subscription Works

Dragos WorldView Threat Intelligence is an annual subscription service that delivers actionable analyst-driven cyber research and reports on adversary threats, malware, and vulnerabilities impacting industrial sectors. Context-rich IOCs relevant to ICS/OT are available for integration with your third-party SIEM/TIP platform or exportable in machine-readable formats.

Operationalize WorldView in collaboration with your intelligence technical account manager (iTAM) identifying your unique intelligence priorities and use cases.

Dragos offers additional Concierge Services to help you manage your ICS/OT cyber threat intelligence in the context of your unique business goals and environmental factors.
