

Atrieve VASCULAR SNARE™ KIT

The Power of Three™

The Atrieve Vascular Snare™ Kit works as an extension of the physician's hand to capture foreign objects in a patient's vasculature. Designed to fit a range of vessel sizes, the presence of three loops increases the probability of foreign body capture and provides a distinct advantage when working in confined spaces.

Atrieve Vascular Snare™ being used to retrieve an Option™ Retrievable Vena Cava Filter

Features & Benefits

Loop Design

- Multiple, independent, short profile loops with tips on each loop for complete vessel coverage
- Platinum strands to provide excellent fluoroscopic visualization

Construction

- Shaft and loops made with Nitinol wire for 1:1 torque control and kink-resistance
- Three overlapping, non-interwoven loops allow for self-sizing to adjust to changing vessel diameter

Delivery Catheter

- 15° angled tip (6Fr and 7Fr sizes only) assists with navigation through tortuous anatomy
- Radiopaque band for increased visibility under fluoroscopy

Product Specifications

Attribute	Specification
Snare Diameter	2-4mm, 4-8mm, 6-10mm, 9-15mm, 12-20mm, 18-30mm, 27-45mm
Snare Shaft Material	Nitinol
Snare Loop Material	Nitinol and Platinum
Catheter Size	3.2 Fr (for 4 & 8mm), 6 Fr (for 10, 15, 20mm), 7 Fr (for 30 & 45mm)
Catheter Material	Fluorinated ethylene propylene (FEP)
Introducer Material	Fluorinated ethylene propylene (FEP)
Torque Device Material	Acrylonitrile Butadiene Styrene (ABS) with brass
Radiopacity	Loops – Platinum Strands Catheter – Platinum band with 10% Iridium

Each kit includes: Atrieve Vascular Snare™, Delivery Catheter, Introducer, and Torque Device
