Declaration

To whom it may concern,

Dear,

We confirm that the needles used for our surgical suture products sold in sterile foil packs are made of stainless steel AISI 302 or 304. It is the best stainless steel grade in the market for high performance surgical needles, combining high ductility and strong bending moment.

Our needles have medical silicon coating and needle geometry for smooth penetration and reduced tissue trauma. The shape of the needle with flattened needle body is designed to allow maximum stability in the needle holder.

Please don't hesitate to contact us if you need further information.

Yours sincerely

SMI AG

Andre Schmitz
Industrial Pharmacist
