## Product Usage

Adhesive bandages, also known as plasters or Band-Aids, have multiple uses in wound care.

They protect wounds from dirt and bacteria, aid in healing, control bleeding, secure dressings, provide pain relief, and offer convenience. Waterproof options are available for use during activities like bathing or swimming.

Material: PE, PVC, EVA, PU, Fabric, Elastic Fabric, Cotton.

## Features

- Customizable size;
- Adhesive: With a sticky side, they stick firmly to the skin;
- Breathable: They let air in to help wounds heal faster;
- Flexibility: Made of flexible materials for a comfortable fit and easy movement;
- Protectiveness: They form a shield against dirt, bacteria, and further injury;
- Easy-to-use: Simple to apply and remove, perfect for minor cuts, scrapes, and blisters;
- Variety of sizes: Many sizes and shapes to fit different wounds and body areas;
- Waterproof: Some can be used in water, keeping wounds dry while showering or bathing.
