SHILEY™ NEONATAL AND PEDIATRIC TRACHEOSTOMY TUBES

Designed with care for your smaller patients

Neonatal

Pediatric

Soft and gentle, these tubes offer:

- Softer, clear material on neck flange for enhanced visualization of the underlying skin and stoma site
- Raised outer eyelets for easier access when inserting the trach tube holder / tape through the eyelets
- A recessed area behind the 15 mm connector to reduce stoma irritation
- A TaperGuard™ cuffed version that features a large valve collar to help prevent accidental insertion of the cuff inflation valve into the 15 mm connector
- Additional sizes specifically for neonatal and pediatric anatomy
- Five styles in a variety of sizes:
 - NCF, 2.5 - 4.5 mm I.D.
 - NEF, 2.5 - 4.5 mm I.D.
 - PEF, 2.5 - 5.5 mm I.D.
 - PCF, 2.5 - 5.5 mm I.D.
 - PELF, 5.0 - 6.5 mm I.D.
 - PLCF, 5.0 - 6.5 mm I.D.

Non-DEHP. Not made with natural rubber latex. Packaged individually, sterile.

SHILEY™ FLEXIBLE ADULT DISPOSABLE AND REUSABLE INNER CANNULA TRACHEOSTOMY TUBES

Clinician-inspired solutions from hospital to home

Available in both cuffed and uncuffed versions, these tubes offer:

- Clear, soft, and flexible flange
- Recessed flange to reduce direct contact with stoma
- Beveled tip and low-profile cuff for easier insertion[†]
- TaperGuard™ cuff to help reduce fluid leakage[†]
- Integrated 15 mm connector
- Range of seven sizes in both Jackson and ISO sizing
- Reusable inner cannula option; may be cleaned and reused up to 29 days for same patient use[§]
- Suture holes to aid with initial placement

Non-DEHP. Not made with natural rubber Latex. Packaged individually, sterile.

Replacement disposable inner cannulae sold separately, in boxes of 10.

[†] Compared to legacy Shiley™ tracheostomy product.

[‡] Sold separately by Cook Medical, Bloomington, IN. 800-457-4500.

[§] Refer to instructions for use for cleaning instructions.

SHILEY™ FLEXIBLE ADULT EVAC WITH TAPERGUARD™ CUFF TRACHEOSTOMY TUBE

Seal the path to a smooth recovery

Available in three configurations:
Single cannula, disposable and
reusable inner cannula with
TaperGuard™ cuff

- Clear, soft, and flexible flange
- Recessed flange to reduce direct contact with stoma
- Taperguard™ Cuff to help reduce fluid leakage
- Beveled tip and low-profile cuff for easier insertion
- Integrated 15 mm connector
- Integrated cuff inflation line with evac portal and integrated suction lumen
- Reusable inner cannual option; may be cleaned and reused up to 29 days for same patient use.

Non-DEHP. Not made with natural rubber latex. Packaged individually, sterile.

SHILEY™ EXTENDED-LENGTH DISPOSABLE INNER CANNULA TRACHEOSTOMY TUBES

Extended length options for patients with unusual anatomies

XLTUP

XLTCP

These flexible dual cannula tubes offer:

- Flexible disposable inner cannula with 15 mm connector†
- Choice of proximal or distal extension
- Choice of cuffed or cuffless style
- Economical, on-the-shelf alternative to custom single-cannula extended-length tubes

ISO sizes 5.0, 6.0, 7.0, and 8.0

Not made with natural rubber latex.
Packaged individually, sterile.

† Replacement inner cannulae sold separately, in boxes of 10.

SHILEY™ DISPOSABLE AND REUSABLE INNER CANNULA FENESTRATED TRACHEOSTOMY TUBES

Fenestrated tracheostomy options

CFN

FEN

DFEN

DCFN

This tube of choice offers:

- Four configurations for ventilatory support and weaning: two disposable inner cannula fenestrated options, and two reusable inner cannula fenestrated options
- Disposable inner cannula with snap-lock 15 mm connector†
- Reusable inner cannula; may be cleaned and reused up to 29 days on a single patient‡
- An integral 15 mm twist-lock connector
- Soft-swivel flange that moves with the patient
- High-volume, low-pressure cuff that provides a gentle and effective seal
- Jackson sizes 4, 6, 8, and 10

Not made with natural rubber latex.
Packaged individually, sterile.

† Disposable inner cannulae sold separately, in boxes of 10.

‡ Refer to directions for use for cleaning instructions.

SHILEY™ LARYNGECTOMY TUBES WITH REUSABLE INNER CANNULA

Designed specifically for maintenance of laryngectomy stoma

These shorter dual cannula tubes offer:

- Economical alternative to hard-to-find metal tubes
- Soft-swivel flange that moves with the patient
- Reusable inner cannula with 15 mm twist-lock connector
- Reusable, low-profile inner cannula to reduce bulk at the stoma (two included)
- Inner cannula that can be cleaned unlimited times during a 29-day use cycle†
- Jackson sizes 6, 8, and 10

Not made with natural rubber latex.
Packaged individually, sterile.

† For single patient use; refer to directions for use for cleaning instructions.

SHILEY™ TRACHEOSTOMY TUBE ACCESSORIES

Essential accessories for patient care and weaning

Effective and easy to use, accessories include:

- Disposable inner cannula (DIC) with integral 15 mm snap-lock connector for use with DFEN, DCFS, and DCFN
- Spare inner cannula (SIC) with red, integral 15 mm twist-lock connector — for temporary use during cleaning or removal of Shiley™ reusable inner cannulae, for use with FEN and CFN
- Fenestrated disposable inner cannula (DCFEN) for use with DFEN and DCFN
- White 15 mm cap (CAP) attaches to the inner cannula and used during weaning to help facilitate breathing through the upper airway; use with Shiley™ fenestrated inner cannulae, or Shiley™ flexible tracheostomy tubes
- Decannulation plug (DCP), closes the proximal end of the FEN and CFN tubes to permit breathing through fenestration and the upper airway
- Disposable decannulation plug (DDCP), closes the proximal end of DCFN and DFEN to permit breathing through fenestration and upper airway

DIC and DCFEN available in Jackson sizes 4, 6, 8, and 10. DDCP and CAP fit all sizes of Shiley™ disposable inner cannula tracheostomy tubes.

Not made with natural rubber latex. Sold in boxes of 10. Packaged individually, sterile.

SHILEY™ PHONATE SPEAKING VALVES

For alert, awake, and spontaneously breathing tracheostomy patients

These speaking valves facilitate vocalization with these features:

- One-way valve that directs airflow past the vocal cords to facilitate speech with no need for finger occlusion
- Secure connection to 15 mm connector
- Available with supplemental oxygen port (SSVO) or without (SSV)
- Airflow resistance² (valve only) of 0.450 L/sec²: 2.3 cm H₂O L/sec²

Not made with natural rubber latex.
Packaged individually.
