EXTERNAL DRAINAGE VENTRICULAR SET

82-1705 CODMAN External Drainage Ventricular Set, sterile, designed to drain CSF from ventricles of the brain. Set includes:

- Two 35cm radiopaque silicone ventricular catheters packaged in separate pouches (1.5mm I.D., 3.1mm O.D.)
- 36cm straight stylet, curved trocar, female luer lock connector and luer lock cap

Can be used with 82-1701 CODMAN External Drainage Collection Bag and Tubing Set

LUMBAR EXTERNAL DRAINAGE KIT

82-1706 CODMAN Lumbar External Drainage Kit, sterile, used for temporary access to the Lumbar Subarachnoid region as a means of draining CSF to reduce increased intracranial volume and pressure.

- Consists of a 46cm silicone Lumbar Catheter (I.D. 0.76mm, O.D.1.65mm), a 14G Touhy Needle with Huber point, a female luer lock connector and cap for connection to monitoring or CSF collection equipment.
- 10 Tantalum location markings on catheter.
- Must be used in conjunction with the CODMAN Drainage collection bag and Tubing Set (82-1721 or 82-1731).

LUMBAR DRAINAGE CATHETER KIT II

The CODMAN Lumbar Drainage Catheter Kit II consists of a lumbar catheter 80cm in length with a closed tip and side holes to allow for drainage without clogging. A Teflon-coated precoiled steel guide wire with an adjustable stop is also included. This kit includes a 14-gauge Touhy needle with a clear plastic flash back chamber, centimeter markings, and wings for leverage and ease of use. A female luer lock connector and suture clips made of soft silicone allow for easy connection and attachment to patient.

80cm Radiopaque Catheter

Drainage hole pattern with enlarged hole diameter

100cm guide wire with dispenser

14 gauge Touhy needle with 1cm depth markings

Low profile female luer lock and luer lock cap

- 82-1707** CODMAN Lumbar Drainage Catheter Kit II
- 82-1709** CODMAN Lumbar Drainage Catheter Kit II with EDSII (82-1721)
- 82-1738** CODMAN Lumbar Drainage Catheter Kit II with EDSIII (82-1731)
