

Declaration

We, **Linet spol s.r.o.**, located in Zelevčice 5, 274 01 Slany, Czech Republic, declare that the beds Eleganza 3XC, Eleganza 1, Eleganza 2, Multicare, Eleganza Smart Narrow, Image 3 are equipped with motor protection, which reduces servicing costs. One of the most common breakdowns of hospital beds is caused by the bed getting stuck under an obstruction (a window sill, etc.) or by the bed being overloaded. The resulting repairs can be costly and time consuming. The upper mentioned beds have an independent current protection for each motor which prevents damage to the motor when overloaded. The protection is electronic and the bed will continue to work without any intervention once the overload is removed.
