

## InnoSpire Deluxe Compressor Nebulizer Features

- Designed to easily manage prolonged use in a clinical environment as well as frequent use in the home
- Proven nebulizer technology coupled with the SideStream provides highly efficient aerosol therapy in fast treatment times
- Reliable and easy to use **compressor nebulizer system** suitable for nebulizing most aerosol medications prescribed for common respiratory diseases
- SideStream nebulizer features an active venturi system that provides air flow in addition to that supplied by the compressor resulting in improved drug delivery and effective treatment times

- Robust **compressor** suitable for continuous use
- Attached power cord tucks neatly into the storage area
- Lid design incorporates 180 degrees hinge and secure latch and can be positioned flat for additional surface space
- Robust handle for easy transport and a nebulizer holder for extra stability while filling the cup or during rest
- Reliable, robust design for consistent high quality aerosol delivery
- **Respironics Nebulizers are compliant with the international basic safety and essential performance standard IEC 60601-1 third edition and its amendments**

1.1.6 punktas.

„Respironics“ purkštuvai atitinka tarptautinį pagrindinį saugos ir esminių veikimo standartų IEC 60601-1 trečiąjį leidimą ir jo pakeitimus
