

Dear Reader,

The origins of EMALED dates back to one of the company's pioneers using LEDs within surgical lights.

3.1

EMA-LED was founded in 2006 with this base and has established as manufacturer with a dual light technology consisting of LEDs and lenses. Exploiting the potential of both light technologies, perfectly coordinated within one lamp, consistently improved over generations and years, we are proud today to deliver a great technology matching high standards of German/ European quality.

You are interested in our lights? Please let us know, how we can support you, your market, your customers and how we can provide greatness within medical technology and support doctors and operators with more convenience and quality.

Furthermore, we are also providing pendants, can connect you with trolley or OP table business and are happy to generate value for your business.

How can we collaborate?
