 Negative Supply

This set includes everything you need to quickly switch out your standard cassette for one that shows full borders with sprockets. You love that look, and we do too! This cassette allows for custom width spacing allowing you to control the “drift” that was apparent on the guides from the previous Film Carrier MK1 and Basic Film Carrier 35. It also shows even more information than the previous designed guides. See sample scans below

Requires: Basic Film Carrier 35 MK2 or Pro Film Carrier 35

Check out the difference between the Standard and Full Border Cassette!
