

PVC umbilical catheter

Catheter in radiopaque and transparent DEHP-free PVC, can be used for umbilical venous catheterisation (parenteral nutrition, drug administration, exchange transfusion, blood sampling...) or for umbilical arterial catheterisation (blood gas analysis, blood pressure measurement...)

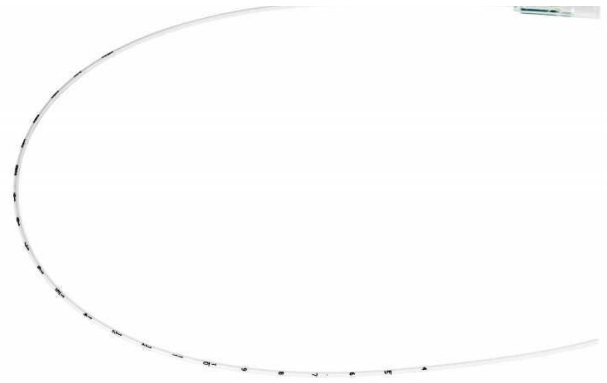

Distance markings every centimetre from 5 to 25 cm.

Open and smoothed distal tip to reduce vascular trauma.

Available in 6 catheter diameters: 3.5* - 4 - 5 - 6 - 7 and 8 Fr

Length: 38 cm

* to be ordered under code 270.03

		Catheter
