

Novosyn[®] Quick TECHNICAL FILE

1

DESCRIPTION

Novosyn® Quick is a sterile, synthetic, fast absorbable and braided surgical suture material made of polyglactin 910. Novosyn® Quick is available in a range of gauge sizes and lengths, non needled or attached to stainless steel needles of varying types and sizes.

2

INDICATIONS

Novosyn® Quick is intended for use in soft tissue approximation when only short term wound support is required and when the rapid absorption of the suture would be beneficial: skin closure, particularly in paediatric surgery, episiotomies, circumcisions and closure of oral mucosa. Novosyn® Quick can also be used for conjunctival suturing and periorcular skin closure in ophthalmic surgery.

3

MATERIAL SPECIFICATIONS

Material:	Polyglactin 910
Coating:	Polyglactin 370 + calcium stearate
Structure:	Multifilament
Colours:	Undyed
USP sizes:	USP 6/0 (0.7 metric) to USP 2 (5 metric)
Tensile strength retention:	Approx. 50 % tensile strength retention after 5 days Approx. 0 % tensile strength retention after 14 days
Mass absorption:	Hydrolysis, complete mass abs in approx. 42 days
Sterilization & Degradation:	Gamma irradiation

4

STORAGE / HANDLING / SHELF LIFE

Storage:	No special storage conditions are required
Shelf-Life:	5 years
Packaging:	DDP

5

CERTIFICATIONS

Novosyn® Quick suture is CE marked and it is classified as a class III product.

Description	
1	Needle code
2	Description of the suture
3	Product name
4	Length of the suture
