

PRODUCT DATA SHEET

Winged Surecan®

High pressure resistant non-coring needle with flexible wings for long term infusion

Winged Surecan® non-coring access port needles with flexible wings are indicated for long-term infusion.

The design of the bevel allows easy penetration of the needle into the septum while eliminating coring and facilitating the closure of the septum after removal of the needle.

The power injectable Winged Surecan® may also be used for injection of contrast media when CT scans are performed.

Features

- With flexible wings for easy puncture and fixation
- Suitable for power injections up to 325 psi (22.4 bar)
- MR conditional
- Latex and DEHP free
- Extension tubing with clamp (PVC-free)
- Tubing length cannula to connector: 200 +/- 10 mm
- Needle with 90 degree angle
- Sterile - non pyrogenic
- Disposable
