SUBJECT: Declaration about percentage of recyclable materials for Cefla Medical products

Cefla s.c. hereby declares that according to the technical analysis on the material composition of the manufactured medical devices (dental chairs, x-ray devices, autoclaves), the average quote of recyclable material is **90%**.

Cefla calculations are in line with the state-of-art level of recycling percentage as reported by some of the most important consortium of waste treatment like "Remedia", that reports for "RAEE Waste Group 4" (medical devices included) a percentage of **90,92 %** of recyclable materials.
