

DUAL LOCK SAFETY CARABINER

Self-closing connector, with adequate strength for use anywhere. This connector is an open able device, which enables a user to link themselves directly or indirectly to an anchor.

This type of carabiner is designed for protecting the final user against falls and to have a gate that moves by pivoting about a hinge (hinge gate) which moves automatically to the closed position when released from any open position.

Aluminium anodized finish with twist section function
Product code : A2120-12120-2T

CE EN12275:2013 & EN362:2004/B

Style : twist lock
Material: Aluminium
Weight : 100 g
Colour : Silver / Blue
Length : 120 mm
Gate opening : 20 mm
Strength closed gate : 26 kN
Strength open gate : 7 kN
Minor axis : 9 kN
