

## LED 130 Examination light

- + 60.000 Lux
- + Fixed focus
- + Ceiling, wall and stand model

## Highlights LED 130

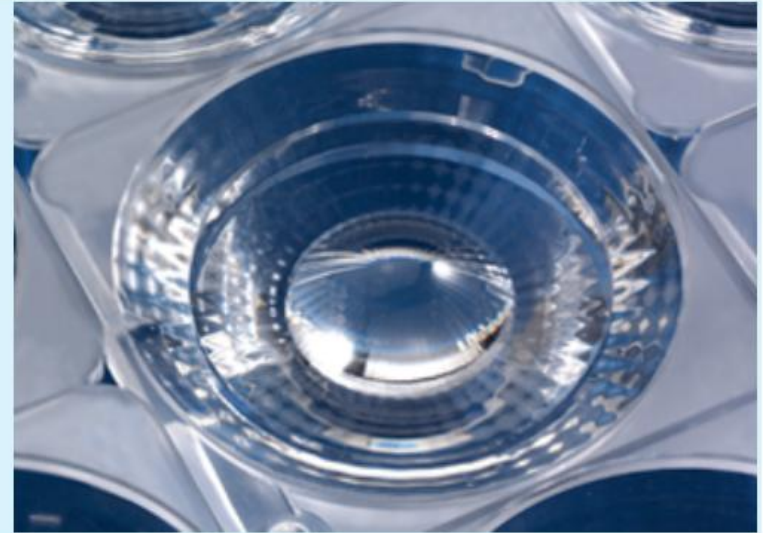

### Effective.

Our LED technology is powerful and even helps to keep a cool head. Heat radiation is thus reduced to a barely perceptible minimum.

## Innovative.

Our faceted multiple lens system ensures lowest shadowing and absolute homogeneity. The computer-calculated and optimized lenses create pinpoint luminous fields, enhance the contrast effect and thus increase detail recognition in the wound field.

## Hygienic.

Our high-quality materials give you security and prevent any penetration of dust, dirt and liquids into the interior of the luminaire. The precisely fitting pane seals and the circumferential sealing cords guarantee you a perfect product down to the smallest detail.

## Technical Data

Light intensity (Lux):	60.000	← Šviesos intensyvumas LX (liuksų) 60 000. Šviesos intensyvumas matuojamas 1 m. atstumu
Colour rendering index Ra:	96	← Šviesos perteikimo indeksas, Ra 96
Colour temperature (Kelvin):	4500	← Spalvinė temperatūra, Kelvinais 4500
Dimming range (%):	50-100	← Šviesos intensyvumas reguliavimas, % nuo 50 iki 100
Number of LED:	19	← LED skaičius vnt. 19
Size of the light field Ø (cm):	14 (fix)	← Šviesos lauko fokusuojamas dydis, cm 14
Total power consumption (W):	16	
Life-span of the LED's (h):	≥ 60.000	← LED tarnavimo laikas, val. 60000
Working distance (in cm):	70-140	
Chassis of the light Ø (cm):	33	← Šviestuvo galvos skersmuo, cm 33
