

DECLARATION

Dry pressed ceramic wall tiles with water absorption $E > 10\%$, manufactured in accordance with the requirements of PN-EN 14411 group BIII, do not contains:

- waste (including processed and thermally processed), ash (including processed and thermally processed), slag (including processed and thermally processed), combustion by-products (including processed and thermally processed), including from the energy industry, heat and power plants, metallurgical plants, metallurgical plants and sewage treatment plants,
- pigments based on compounds of lead, cadmium, chromium (VI), mercury and carcinogenic cat.1 and 2 /mutagenic cat. 1 and 2/ negatively affecting reproduction, cat. 1 and 2 organic compounds,
- SVHC substances, substances from Annexes XIV and XVII of the REACH regulation,
- biocides and nanoparticles,
- sepiolite and attapulgit,
- asbestos and its varieties,
- formaldehyde
- chlorine
