1.	C-JOB	 64037930-e1a3-4055 -bbae-9c0684770c85.	<i>Initial proposal document</i>	<p>The technical drawings of the electric pusher (ship) are considered to trade secret of Kotug push it B.V., i.e., such information meets the criteria set forth in Article 1.116(1)(1) of the Civil Code:</p> <p>1) Confidentiality of information.</p> <p>Drawings of such detail (as opposed to ordinary visualizations) are not publicly available, and Kotug push it B.V. has never published them publicly, e.g., on its website or in other public sources. Therefore, competitors of Kotug push-it B.V. have no opportunity to access this information.</p> <p>Their disclosure would enable competitors to copy product of Kotug push-it B.V. without investment, which could result in a loss of market share and a reduction in the supplier's competitive advantage.</p> <p>2) The value of the information.</p> <p>Firstly, these detailed technical drawings reveal the essential design solutions and technologies used by Kotug push-it B.V, as well as the selection methodology that allows the manufacture of a complete product – the E-Pusher L electric pusher. Thus, the disclosure of such drawings would be sufficient to enable competitors of Kotug push-it B.V. to copy it, i.e., to manufacture a similar product.</p> <p>Secondly, disclosure of such drawings would cause damage to Kotug push-it B.V. Competitors would have the technical capability to use this information to manufacture their own competing products. This would reduce market share and competitive advantage over its competitors, e.g. Kotug push-it</p>

			<p>B.V would find it more difficult to win public procurement contracts or sell its product, as competitors, having the same essential technical information (but without having incurred the costs of creating it), would be able to offer a more competitive price for similar products. Thus, disclosure of this information poses a risk that Kotug push-it B.V would lose its current competitive advantage precisely because of it (and not because of fair competition), the existence of which is confirmed, inter alia, by the fact that Kotug won this tender by offering the most competitive price.</p> <p>Thirdly, although the subject of this procurement is only the E-Pusher L electric pusher model, Kotug push-it B.V supplies (manufactures) the entire E-Pusher ship line, i.e. E-Pusher S, E-Pusher M, and E-Pusher L. The entire line of these vessels uses similar advanced designs and technologies (as can be seen from the above drawing). Meanwhile, the main distinguishing feature of these vessels is their size (length), which corresponds to the model numbering from S to L. These circumstances mean that, if the aforementioned drawing were disclosed, it is highly likely that competitors would be able to replicate and manufacture not only the E-Pusher L vessel that is the subject of this purchase, but also the smaller vessels E-Pusher S and E-Pusher M from the same line . Due to these circumstances, there is a real possibility that the damage to Kotug push-it B.V caused by the disclosure of the drawings would not be limited to the object of the purchase, but would also extend to other Kotug push-it B.V products.</p> <p>Finally, according to the practice of the Supreme Court , the time advantage is very important for the value of a trade secret – a trade secret is likely to have the greatest competitive value immediately after its creation, as it allows its owner to use the secret to produce new goods or offer new services, thus deriving maximum benefit from the trade secret. Therefore, the unlawful acquisition, disclosure, or use of newer, more timely information is likely to cause more painful</p>

				<p>consequences for its owner than older information.</p> <p>The E-Pusher line of electric thrusters are new products that use advanced designs and technologies. The first electric thruster of this type was only introduced in June 2023, and VVKD is one of Kotug push-it B.V first customers for this line of vessels. Kotug push-it B.V For this reason, the possibility that Kotug's competitors could replicate this product now would clearly cause Kotug push-it B.V to suffer real losses, not only due to the loss of its competitive advantage, but also due to its unrecovered investment.</p> <p>3) Reasonable efforts to maintain confidentiality.</p> <p>Kotug has taken active measures to ensure the confidentiality of commercially sensitive information contained in the drawings. In addition to Kotug push-it B.V internal technical measures, only a limited number of persons are allowed to access these drawings. Kotug push-it B.V an entire section 7 is devoted to this, which, among other things, imposes an obligation on Kotug push-it B.V contractors to "take all reasonable measures to ensure the secure storage and use of confidential information." In other words, Kotug push-it B.V has taken measures to ensure that not only Kotug push-it B.V itself, but also its contractors, maintain the confidentiality of confidential information.</p>
2.	Kotug	 Average annual revenue document.pdf	Average annual income exceeds €1,500,000	<p>Firstly, information about revenues of Kotug push-it B.V is commercially sensitive because it reveals market share, the scale of operations, and future business prospects (revenue growth). Competitors could therefore use this strategic information when planning their pricing, especially in a market for specialized products such as electric thrusters, which has a limited number of market participants.</p> <p>Secondly, the information on specific revenues contained in this Kotug push-it B.V statement is not public because:</p> <p>(i) some of the information contained in the Kotug push-it B.V statement has not been submitted to the Netherlands</p>

				<p>Companies Register and is therefore it is not public, i.e. the last financial report submitted to the register is for 2023, while the Kotug push-it B.V statement shows average annual revenues for a longer period, i.e. for both 2024 and part of 2025;</p> <p>ii) The income information in the Netherlands company register is not publicly available.
