

Pediatric Bone Marrow Access Needle

Ideal for intraosseous therapy

No. ION18015

In addition to the easy and efficient aspiration of marrow in pediatric patients, the needle can be used to access medullary cavities when initiating resuscitative infusion.

Features include:

- ❑ Each needle is 18 G regular wall (thicker wall) to provide extra support during insertion
- ❑ Each stylet has a special trocar point for easy insertion
- ❑ A luer lock connection is provided for secure syringe attachment

US Patent Number X9585527
