Find the Essentials lab products you need

Nuclease-free Water (not DEPC-treated) has been deionized, filtered into the final bottle, and autoclaved. It is ready to use and requires no preparation, mixing, or autoclaving. This nuclease-free water is rigorously tested for contaminating nonspecific endonuclease, exonuclease, and RNase activity.

Using Nuclease-free Water

Because this water is not DEPC-treated, it is recommended for applications for which residual DEPC might prove detrimental (e.g., oocyte microinjection).

For Research Use Only. Not for use in diagnostic procedures.

Specifications

| | |
|----------------------------|-------------------------------|
| pH | 6 to 8 |
| Recommended Storage | Store at room temperature. |
| Grade | Molecular Biology |
| Packaging | Bottle |
| Treatment(s) | Not DEPC-Treated |
| Quantity | 1 x 100 mL |
| Purification Method | Autoclaved, Membrane-Filtered |
| Shipping Condition | Room Temperature |
| Product Line | Ambion™ |

Frequently asked questions (FAQs)

I would like to order a TaqMan SNP Genotyping Assay. Does the kit include everything I need to perform my experiment or do I need to purchase reagents separately?
