

## REDON DRAINS (PVC) with trocar

Redon drena su trokaru  
**Redon drains (PVC) with trocar**

Redon drains are suitable for use with high-vacuum systems and low-vacuum systems for postoperative wound drainage.

### Product features:

- Made of soft, flexible polyvinyl chloride (PVC) and a trocar (preconnected guide needle) made of medical grade stainless steel
- Sharp trocar enables ideal positioning of the drain
- With radiopaque stripe
- Implant tested in accordance with USP XXIII
- Alternating perforation to avoid ingrowth of tissue
- Rounded drainage openings for removal of secretion
- Length markings allow simple repositioning
