

## HYDROPHILIC GUIDE WIRE

BACK TO SUMMARY

With turning function when pass through the stricture.

Improve the success rate of intubation compare to the normal wire.

Great tip resilience, back to straight after stenosis pass.

42.p.d. kreipiamoji styga

Primary packaging: Pouch

Secondary packaging: cardboard box

### Description:

- Nitinol core provides good flexibility / push compromise,
- PTFE coated,
- Radio-opaque distal end.

Dviejų darbinių galų itin slidi kreipiamoji viela (styga pravediklis), 0,025" – 0,035 skersmens, hidrofiliinė danga, atsparus užlenkimams, pilnai rengenokontarstinis galas, 260 cm ilgio.
