Spirotome

The Spirotome Biopsy Needle Set is a family of core soft tissue biopsy medical devices to be used in humans to take out adequate samples of soft tissue from subdermal structures as breast, abdominal wall, thoracic wall, lymph nodes, thyroid, parotis, muscles, and liver.

Part Number	Description	UOM
SS-08-20	8G, 200mm	Box of 5
SS-08-15	8G, 150mm	Box of 5
SS-08-10	8G, 100mm	Box of 5
SS-08-08	8G, 80 mm	Box of 5
SS-08-06	8G, 60 mm	Box of 5
SS-10-20	10G, 200mm	Box of 5
SS-10-15	10G, 150mm	Box of 5
SS-10-10	10G, 100 mm	Box of 5
SS-10-08	10G, 80 mm	Box of 5
SS-10-06	10G, 60 mm	Box of 5
SS-14-15	14G, 150mm	Box of 5
SS-14-10	14G, 100 mm	Box of 5
SS-14-08	14G, 80 mm	Box of 5
SS-14-06	14G, 60 mm	Box of 5

Spirotome MRI

Spirotome soft tissue biopsy kit for use under magnetic resonance imaging. MRI guides can be manufactured sterile and custom-made. The Spirotome Biopsy Needle Set is a family of core soft tissue biopsy medical devices to be used in humans to take out adequate samples of soft tissue from subdermal structures as breast, abdominal wall, thoracic wall, lymph nodes, thyroid, parotis, muscles, and liver.

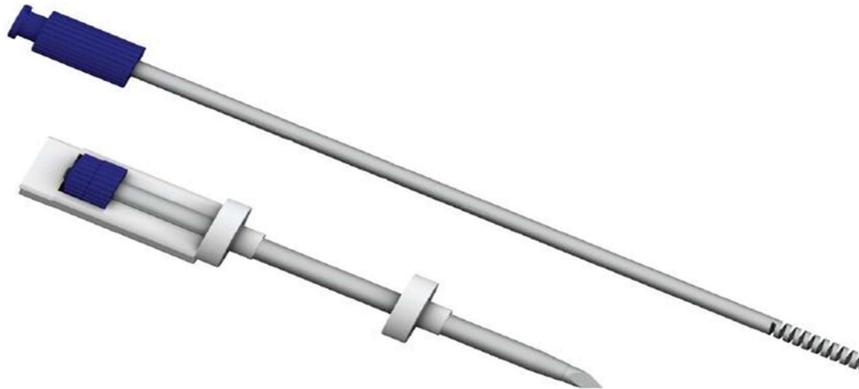

Part Number	Description	UOM
SS-08-MR	8G, 150 mm	Box of 5
SS-10-MR	10G, 150mm	Box of 5
SA-MR-10	MRI GUIDE 10 G	Box of 1
SA-MR-08	MRI GUIDE 8 G	Box of 1

Spirotome STEREOTACTIC

Spirotome soft tissue biopsy kit for tissue acquisition under stereotactic guidance. Adaptors and guides are custom made according to the radiological equipment. The Spirotome Biopsy Needle Set is a family of core soft tissue biopsy medical devices to be used in humans to take out adequate samples of soft tissue from subdermal structures as breast, abdominal wall, thoracic wall, lymph nodes, thyroid, parotis, muscles, and liver.

Part Number	Description	UOM
SS-08-ST-CM-ST	Spirotome 08G Custom made for stereotaxis	Box of 5
SS-10-ST-CM-ST	Spirotome 10G Custom made for stereotaxis	Box of 5
SS-08-ST-CM-STGE	Spirotome 08G Custom made for stereotaxis General Electric	Box of 5
SS-010-ST-CM-STGE	Spirotome 10G Custom made for stereotaxis General Electric	Box of 5
SS-08-ST-CM-STFU	Spirotome 08G Custom made for stereotaxis Fujifilm	Box of 5
SS-10-ST-CM-STFU	Spirotome 10G Custom made for stereotaxis Fujifilm	Box of 5
SS-08-ST-CM-STLO	Spirotome 08G Custom made for stereotaxis Lorad	Box of 5
SS-10-ST-CM-STLO	Spirotome 10G Custom made for stereotaxis Lorad	Box of 5
SA-SI-10G	Siemens Opdima Re-usable Adaptor 10 G	Box of 1
SA-SI-08G	Siemens Opdima Re-usable Adaptor 08 G	Box of 1

Spirotome CERVICORE

The Spirotome Biopsy Needle Set is a family of core soft tissue biopsy medical devices to be used in humans to take out adequate samples of soft tissue from subdermal structures as breast, abdominal wall, thoracic wall, lymph nodes, thyroid, parotis, muscles, and liver. The Cervicore is for gynecological use on mucosal structures.

Part Number	Description	UOM
SS-10-CE	Single Use 10 G 200 mm	Box of 5
SS-08-CE	Single Use 08 G 200 mm	Box of 5

Spirotome ENDO

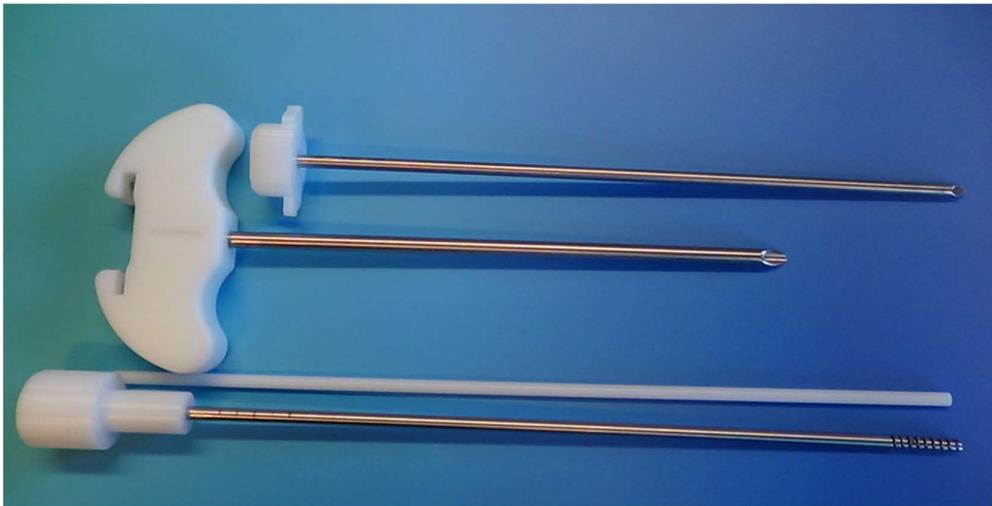

The Spirotome Biopsy Needle Set is a family of core soft tissue biopsy medical devices to be used in humans to take out adequate samples of soft tissue from subdermal structures as breast, abdominal wall, thoracic wall, lymph nodes, thyroid, parotis, muscles, and liver. The Spirotome Endo's main purpose is to obtain mucosal and submucosal tissues in gynecology.

Part Number	Description	UOM
SSo8EN	Single Use 8G Endo 350 mm	Box of 5
SS1oEN	Single Use 10G Endo 350 mm	Box of 5
SS14EN	Single Use 14G Endo 350 mm	Box of 5
SS14EN1	Single Use 14G Endo 350 mm 10 mm helix	Box of 5

Spirotome BONE

The Spirotome Biopsy Needle Set is a family of core soft tissue biopsy medical devices to be used in humans to take out adequate samples of soft tissue from subdermal structures as breast, abdominal wall, thoracic wall, lymph nodes, thyroid, parotis, muscles, and liver. The Spirotome Bone is a soft tissue biopsy system for osteolytic lesions in bony structures in musculoskeletal applications or orthopedics.

Part Number	Description	UOM
SS-08-BO	Single Use BONE 8 G 150 mm	Box of 5
SS-10-BO	Single Use BONE 10 G 150 mm	Box of 5

Spirotome SPINE (Vertebroplasty)

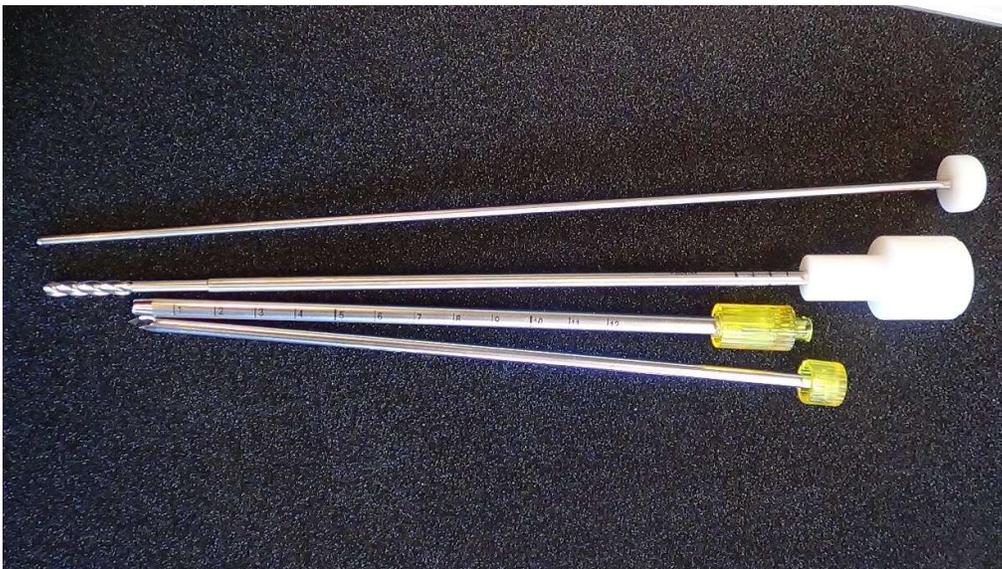

The Spirotome Biopsy Needle Set is a family of core soft tissue biopsy medical devices to be used in humans to take out adequate samples of soft tissue from subdermal structures as breast, abdominal wall, thoracic wall, lymph nodes, thyroid, parotis, muscles, and liver. The Spirotome Spine adds a cement injection needle to the soft tissue biopsy kit for soft bony lesions where new intelligent vertebroplasty is combined with biopsy.

Part Number	Description	UOM
SS-08-SP	Single Use Spine 8 G 150 mm	Box of 5
SS-10-SP	Single Use Spine 10 G 150 mm	Box of 5

Corticore

The Corticore line of biopsy products are biopsy devices for sclerotic bone tissues based on a drill with 2 receiving spaces and a cutting cannula. The stylet is to remove tissue from the inner receiving room of the Corticore.

Part Number	Description	UOM
SS-08-CO	Single Use Corticore 8 G 150 mm	Box of 5
SS-10-CO	Single Use Corticore 10 G 150 mm	Box of 5
