### Description

#### Cryo-Marker™ – Cryogenic Waterproof Permanent Marker

This high-quality, dual point cryogenic marker has a fine tip, as well as an extra-fine tip, perfect for marking small containers. Its durable, long-lasting nibs can withstand rough treatment and provide a delicate touch on various surfaces, including plastic, glass, metal, cloth, and even Teflon. Permanent and waterproof when dry, our cryo markers can be used to identify containers directly or used on writable LabTAG label products at room temperature before storing them in liquid nitrogen (-196°C) or deep freeze (-80°C) storage conditions. Sold in packs of 6

#### Benefits:

- › Extra-Fine (0.3 mm) and fine (0.7 mm) tips – 2 pens in 1
- › Excellent performance on plastic, glass, metal, cloth & Teflon surfaces
- › Easy to handle for applications in bio-medical laboratories
- › Compatible with [Lab-Tag™ Labels](#) from GA International Inc.

**Available Colors:** Black, Blue, Red, Green, Purple, Orange, Brown, Yellow
