

FreezerTAG™

Deep-Freeze Labels for Thermal-Transfer Barcode Printers

Benefits:

- ▶ Perfectly suited for the identification of vials and tubes
- ▶ Freezer-grade adhesive allows labels to adhere to wet surfaces
- ▶ Resist short and long-term storage in deep-freeze conditions (-80°C/-112°F)

Thermal-transfer deep-freeze labels designed specifically for small diameter cryo tubes, vials, boxes, Falcon tubes, cardboard and polypropylene freezer boxes, cell culture plates, Petri dishes, plastic bags, and other containers, for storage in ultra-low temperature freezers (-80°C), and transportation on dry ice. The waterproof labels are able to adhere to wet and humid surfaces, and withstand a range of temperatures as well as sterilization by gamma irradiation (up to 50 KGy).

These freezer-grade labels are also wear-and-tear proof, and capable of withstanding high temperatures. As such, these deep-freeze barcodes labels are suitable for general lab use, including the identification of beakers, flasks, boxes, and plastic or glass bottles stored in refrigerators, freezers, at room temperature, or in heated water baths. Compatible with all common thermal-transfer printer brands.

Recommended Ribbons:

Alcohol & Smudge-Proof RR-Class (P.99)

Permanent

Temperature range -80°C to +110°C (-112°F to +230°F)

These freezer-proof permanent labels are made from a durable thermoplastic film and can resist spraying with ethanol, isopropanol, and other alcohols.
