

WEIGHING BOATS

The LABSOLUTE® weighing boats made of PS feature smooth surfaces to transfer each kind of sample easily with minimal sample loss. The material is antistatic, biologically inert and resistant to both weak and diluted acids, bases and alcohols and to temperatures from -10 °C up to 70 °C. All dishes are food-grade compliant and can be used with microwave moisture analyzers. Available in white and black.

WEIGHING BOATS, SQUARE, PS

The antistatic dishes feature a flat bottom for a secure stand. The round corners simplify the transfer of each kind of sample.
