

# Raucodrape® PRO OR Drape System

## High-performance products for the OR

Raucodrape PRO OR drapes are high performance products for your OR that ensure safety regardless of the situation. The special combination of two layers – PP\* nonwoven and PE\* film – ensures that the entire drape is absorbent and impermeable to fluids. It is both tear-resistant and highly flexible, ensuring a high degree of user safety in the OR.

### The advantages of Raucodrape PRO 2-layered for you:

- for procedures with low to moderate amounts of fluid
- its entire surface is absorbent and impermeable to fluids
- safe barrier effect against penetration by fluids and bacteria
- high tensile strength
- very low linting
- exceeds DIN EN 13795 requirements
- raw materials free of natural rubber latex

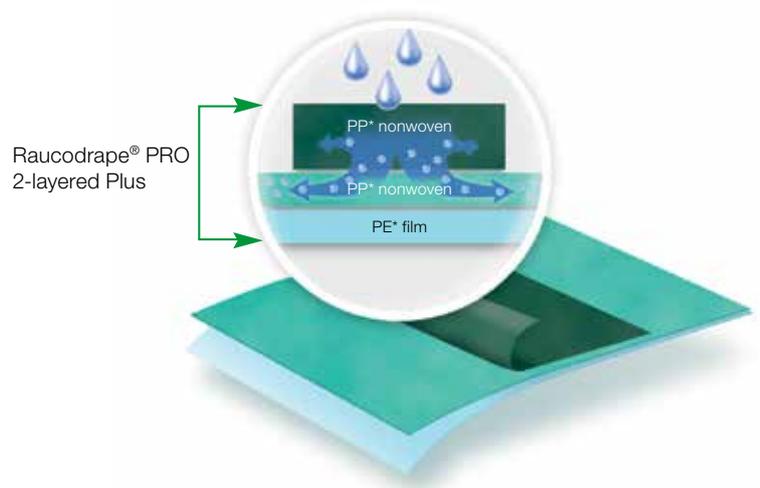

# Raucodrape® PRO 2-layered Plus

## A "plus" in high performance standard

A plus for procedures with high amounts of fluid.

### The additional advantages of Raucodrape PRO 2-layered Plus

- reinforced OR field with an additional nonwoven layer
- high absorption capacity
- excellent rate of absorption
- very high tensile strength
- very low linting
- exceeds DIN EN 13795 requirements
- raw materials free of natural rubber latex

\* PE: polyethylene, PP: polypropylene
